Department of Vermont Health Access
Pharmacy Benefit Management Program

Vermont Preferred Drug List and Drugs Requiring Prior Authorization
(includes clinical criteria)

The Commissioner for Office of Vermont Health Access shall establish a pharmacy best practices and cost control program designed to reduce the cost of providing prescription drugs, while maintaining high quality in prescription drug therapies. The program shall include:

"A preferred list of covered prescription drugs that identifies preferred choices within therapeutic classes for particular diseases and conditions, including generic alternatives"

From Act 127 passed in 2002

The following pages contain:

- The therapeutic classes of drugs subject to the Preferred Drug List, the drugs within those categories and the criteria required for Prior Authorization (P.A.) of non-preferred drugs in those categories.
- The therapeutic classes of drugs which have clinical criteria for Prior Authorization may or may not be subject to a preferred agent.
- Within bothof these categories there may be drugs or even drug classes that are subject to Quantity Limit Parameters.

Therapeutic class criteria are listed alphabetically. Within each category the Preferred Drugs are noted in the left-hand columns. Representative non-preferred agents have been included and are listed in the right-hand column. Any drug not listed as preferred in any of the included categories requires Prior Authorization.

GHS/Change Healthcare **PRESCRIBER Call Center:** PA Requests Tel: 1-844-679-5363; Fax: 1-844-679-5366 Note: Fax requests are responded to within 24 hrs.	**Change Healthcare** **PHARMACY Call Center:** PA Requests Tel: 1-844-679-5362 Available for assistance with claims processing	**GHS/Change Healthcare Sr. Account Manager:** Michael Ouellette, RPh Tel: 802-922-9614 Fax: E-Mail: mouellette@changehealthcare.com
	DVHA Pharmacy Unit Staff: Stacey Baker Tel: 802-241-0140 Fax: 802-879-5651 E-Mail: stacey.baker@vermont.gov	**DVHA Pharmacy Administration:** *Director of Pharmacy Services* Nancy Hogue, Pharm. D. Tel: 802-241-0143 Fax: 802-879-5651 E-mail: nancy.hogue@vermont.gov

This is not an all-inclusive list of available covered drugs and includes only managed categories. Unless otherwise stated, the listing of a particular brand or generic name includes all dosage forms of that drug. NR indicates a new drug that has not yet been reviewed by the P&T Committee.

Drugs highlighted in yellow denote a change in PDL status.

Contents

PREFERRED AGENTS (No PA required unless otherwise noted)	NON-PREFERRED AGENTS (PA required)	PA CRITERIA
ACNE AGENTS		
ORAL AGENTS		
ISOTRETINOIN CAP (AMNESTEEM, CLARAVIS, MYORISAN)	Absorica® (isotretinoin) capsules Zenatane (isotrentinoin) capsules	**Absorica/Zenatane:** patient has had a documented side effect, allergy, or treatment failure with at least two isotretinoin preferred products.
TOPICAL AGENTS		
<u>BENZOYL PEROXIDE PRODUCTS</u> BENZOYL PEROXIDE 2.5%, 5%, 10% ; 3%, 5%, 6%, 10% CL; 5%, 6%, 10% L; 5.3%, 9.8% F PANOXYL 10% B; 4%, 10% CL, 3% G <u>CLINDAMYCIN PRODUCTS</u> CLINDAMYCIN 1% *S, G, L, P,* <u>ERYTHROMYCIN PRODUCTS</u> ERYTHROMYCIN 2% *S, G, P* <u>SODIUM SULFACETAMIDE PRODUCTS</u> All Products Require PA <u>COMBINATION PRODUCTS</u> ERYTHROMYCIN / BENZOYL PEROXIDE CLINDAMYCIN/BENZOYL PEROXIDE (compare to Benzaclin®) <u>OTHER</u> *C=cream, CL=cleanser, E=emulsion, F=Foam, G=gel, L=lotion,O=ointment, P=pads,*	Clindamycin 1%F Cleocin-T®* (clindamycin) 1% S, P, L, G Erygel®* (erythromycin 2% G) Klaron®* (sodium sulfacetamide 10% L) Sodium Sulfacetamide 10% *L* Benzaclin® (clindamycin/benyoyl peroxide) Azelex® (azelaic acid 20%C) DUAC® (clindamycin/benzoyl peroxide) gel Benzamycin®* (erythromycin/benzoyl peroxide) Onexton® (clindamycin/benzoyl peroxide) Sodium Sulfacetamide/Sulfur C*L, C, P, E,* Sodium Sulfacetamide/Sulfur *W* Sumaxin ® (sulfacetamide/sulfur*L,P,W*)	**Single ingredient products :** patient has had a documented side effect, allergy, or treatment failure with two preferred products including one from the same sub-category, if there is one available. If a product has an AB rated generic, there must have been a trial of the generic. **Combination products :** patient has had a documented side effect, allergy, or treatment failure with generic erythroymycin/benzoyl peroxide or clindamycin/benzoyl peroxide. (If a product has an AB rated generic, there must have been a trial of the generic.) AND patient has had a documented side effect or treatment failure on combination therapy with the separate generic ingredients of the requested combination product, if applicable. **Azelex:** the diagnosis or indication is acne AND patient has had a documented side effect, allergy, or treatment failure with two generic topical anti-infective agents (benzoyl peroxide, clindamycin, erythromycin, erythroymcin/benzoyl peroxide,) **Limitations:** Kits with non-drug products are not covered **Onexton :** Prior authorization and be available to the few patients who are unable to tolerate or who have failed on preferred medications.

PREFERRED AGENTS (No PA required unless otherwise noted)	NON-PREFERRED AGENTS (PA required)	PA CRITERIA
S=solution, W=wash, B=bar	Rosula®* (sulfacetamide/sulfur P, W) Aczone® (dapsone 5% G) Dapsone (compare to Aczone) 5% G All other brands any topical acne anti-infective medication	
TOPICAL - RETINOIDS		
AVITA® (tretinoin) DIFFERIN® (adapalene) 0.1% C, G; L 0.3% G FABIOR® (tazarotene 0.1% F) RETIN-A® (tretinoin) 0.025%, 0.05%, 0.1% C; 0.01%, 0.025% G TAZORAC® (tazarotene) 0.1% *C, G* C= *cream*, G=*gel*, L=*lotion*	Adapalene (compare to Differin®) 0.1% C, G, 0.3% G Altreno™ (tretinoin) 0.05% L Atralin® (tretinoin) 0.05% G Plixda® (adapalene) 0.1% swabs Retin-A Micro® (tretinoin microsphere) 0.04%, 0.06%, 0.08%, 0.1% G Tretinoin (compare to Retin-A®) 0.025%, 0.05%, 0.1% C; 0.01%, 0.025% G Tretinoin microsphere (compare to Retin-A Micro®) 0.1%, 0.04%	**Altreno, Atralin, Retin-A Micro, tretinoin, tretinoin microsphere:** diagnosis or indication is acne vulgaris, actinic keratosis, or rosacea AND patient has had a documented side effect, allergy, or treatment failure with a preferred topical tretinoin product (Avita or Retin-A®). **Adapalene:** patient has had a documented side effect, allergy, or treatment failure with brand Differin. **Plixda:** patient has had a documentd side effect, allergy, or treatment failure with brand Differin AND a generic adapalene product. **Limitations:** Coverage of topical retinoid products will not be approved for cosmetic use (wrinkles age spots, etc.) (i.e. Avage, Renova, Tri-Luma).
TOPICAL - ROSACEA		
FINACEA® (azelaic acid) 15% *G*, F METRONIDAZOLE 0.75% *C, G, L* *C=cream, F=Foam, G=gel, L=lotion*	All brand metronidazole products (MetroCream®* 0.75% *C*, Metrogel® 1% *G*, MetroLotion®* 0.75% *L*, Noritate® 1% *C* etc.) Metronidazole 1% *G* Rhofade™ (oxymetazoline) 1%C Soolantra® (ivermectin)	**Brand name metronidazole products, metronidazole 1% gel (generic), Rhofade and Soolantra**: diagnosis or indication is roacea AND patient has had a documented side effect, allergy or treatment failure with a preferred generic topical metronidazole product. If a product has an AB rated generic, there must have also been a trial of the generic formulation. **Limitations**: The use of Mirvaso (brimonidine topical gel) for treating skin redness is considered cosmetic. Medications used for cosmetic purposes are excluded from coverage. Mirvaso topical gel has not been shown to improve any other symptom of rosacea (e.g. pustules, papules, flushing, etc) or to alter the course of the disease.
ADHD AND NARCOLEPSY CATAPLEXY MEDICATIONS		
SHORT/INTERMEDIATE ACTING STIMULANTS		
DEXMETHYLPHENIDATE (compare to Focalin®)	Dextroamphetamine IR (Zenzedi 5 or 10mg, formerly	**Clinical Criteria for ALL non-preferred drugs:** patient has a diagnosis of

PREFERRED AGENTS (No PA required unless otherwise noted)	NON-PREFERRED AGENTS (PA required)	PA CRITERIA
METADATE ER® (compare to Ritalin® SR) METHYLIN® (compare to Ritalin®) solution METHYLPHENIDATE (compare to Ritalin®) tablets, chewable tablets AMPHETAMINE/DETROAMPHETAMINE (compare to Adderall®)	Dexedrine®) Evekeo® (amphetamine sulfate) Focalin® (dexmethylphenidate) Ritalin®* (methylphenidate) Adderall®* (amphetamine/dextroamphetamine) Desoxyn® (methamphetamine) Dextroamphetamine sulfate 1 mg/ml oral solution Methamphetamine (compare to Desoxyn®) Methylphenidate solution Methylphenidate SR (compare to Ritalin® SR) Procentra® (dextroamphetamine sulfate) 1 mg/ml oral solution Zenzedi® (dextroamphetamine IR) 2.5 mg, 7.5 mg, 15 mg, 20 mg, 30 mg tablets	ADD, ADHD or narcolepsy AND patient has been started and stabilized on the requested medication. (Note: samples are not considered adequate justification for stabilization.) OR patient meets additional clinical criteria outlined below. **Focalin, Adderall, Ritalin:** the patient must have had a documented intolerance to the preferred generic equivalent. **Methamphetamine and Desoxyn:** Given the high abuse potential of methamphetamine and Desoxyn, the patient must have a diagnosis of ADD, ADHD or narcolepsy and have failed all preferred treatment alternatives. In addition, for approval of brand name Desoxyn, the patient must have had a documented intolerance to generic methamphetamine. **Methylphenidate solution:** patient has a documented intolerance to Methylin solution. **Methylphenidate SR:** the patient has had a documented side-effect, allergy, or treatment failure to at least 2 preferred methylphenidate products (may be short or long acting due to intermediate duration of action) **Procentra, dextroamphetamine oral solution:** patient has a medical necessity for an oral liquid dosage form. (eg. Swallowing disorder). AND if the request is for Procentra, the patient has a documented intolerance to the generic equivalent. **Dextroamphetamine IR, Zenzedi, Evekeo:** the patient has had a documented side-effect, allergy, or treatment failure of at least 2 preferred agents.
LONG ACTING STIMULANTS		
Methylphenidate Products **Oral** APTENSIO®XR (methylphenidate DR 24HR IR/.ER, 40:60%) CONCERTA®* (methylphenidate SA OSM IR/ER, 22:78%) FOCALIN® XR (dexmethylphenidate SR 24 HR IR/ER, 50:50%) QUILLICHEW ER ™ (methylphenidate IR/ER, 30:70%) chewable tablets **Oral Suspension** QUILLIVANT XR® (methylphenidate IR/ER, 20:80%) QTY LIMIT = 1 bottle (60ml, 120ml, 150ml)/30days 2 bottles (180ml)/30days **Transdermal** DAYTRANA® (methylphenidate patch) (*QTY LIMIT = 1 patch/day)*	Cotempla® XR (methylphenidate IR/ER 25:75%) ODT Dexmethylphenidate SR 24 HR IR/ER, 50:50% (compare to Focalin XR®) methylphenidate CR, IR/ER, 30:70% (compare to Metadate CD®) Methylphenidate SA OSM IR/ER, 22:78% (compare to Concerta®) Methylphenidate SR 24 HR, IR/ER, 50:50% (compare to Ritalin LA®) Ritalin LA® (methylphenidateSR 24 HR, IR/ER, 50:50%)	**Clinical criterial for ALL non-preferred drugs:** the patient has a diagnosis of ADD, ADHD or narcolepsy AND has been started and stabilized on the requested medication. (Note: samples are not considered adequate justification for stabilization) OR meets the additional clinical criteria outlined below. **Cotempla XR ODT, Ritalin LA, and Methylphenidate CR, Methylphenidate SR 24 HR:** patient has had a documented side-effect, allergy, or treatment failure on. 2 preferred long-acting Methylphenidate products AND for approval of Ritalin LA, the patient must have a documented intolerance to the generic equivalent. **dexmethylphenidate SR 24 HR ER (generic):** patient must have a documented intolerance to the brand name equivalent. **Methylphenidate SA OSM (AB-rated and BX-rated generics for Concerta):** the patient must have a documented intolerance to brand Concerta. **Adderall XR, Dexedrine CR, dextroamphetamine SR, Dyanavel, Mydayis:** patient must have a documented intolerance to two preferred amphetamine products. For approval of Adderall XR or brand Dexedrine CR, the patient must also have a documented intolerance to the generic equivalent. **Adzenys XR ODT, Adzenys ER suspension:** patient has had a documented side-effect, allergy, or treatment failure to Vyvanse chewable.

PREFERRED AGENTS (No PA required unless otherwise noted)	NON-PREFERRED AGENTS (PA required)	PA CRITERIA
Amphetamine Products **Oral** AMPHETAMINE/DEXTROAMPHETAMINE SR 24 HR, IR/ER, 50:50% (compare to Adderall XR®) VYVANSE® (lisdexamfetamine) capsule, chewable tablet *(QTY LIMIT = 1 cap or tab/day)*	Adderall XR® (amphetamine/dextroamphetamine SR 24 HR, IR/ER, 50:50%) Adzenys XR® ODT (amphetamine SR 24 HR, IR/ER, 50:50%) (QTY LIMIT= 1 cap/day) Adzenys ER™ suspension (amphetamine SR 24 HR, IR/ER, 50:50%) Dyanavel ™ suspension (amphetamine/dextroamphetamine SR) (QTY LIMIT=240ml/30days) Dexedrine CR®* (dextroamphetamine 24 hr SR) Dextroamphetamine 24 hr SR (compare to Dexedrine CR®) Mydayis® (mixed amphetamine salts) extened-release capsules	
MISCELLANEOUS		
ARMODAFINIL (compare to Nuvigil®) *Qty Limit:* 50mg = 2 tabs/day *150mg/200mg/250mg = 1 tab/day (max days supply = 30 days)* ATOMOXETINE (compare to Strattera®) *Qty Limit:10, 18, 25 and 40 mg = 2 capsules/day* *60, 80 and 100 mg = 1 capsule/day* *FDA maximum recommended dose = 100 mg/day* CLONIDINE ER (compare to Kapvay®) *Qty Limit = 4 tabs/day* GUANFACINE ER (Intuniv®) KAPVAY® (clonidine extended release) Tablet *Qty Limit = 4 tablets/day* MODAFINIL(compare to Provigil®) *Qty Limit: 100 mg = 1.5 tablets/day;200 mg = 2 tablets/day* *Maximum Daily Dose = 400 mg*	Nuvigil® (armodafinil) *Qty Limit: 50 mg = 2 tablets/day; 150 mg/200 mg/250 mg = 1 tablet/day* Provigil® (modafinil) *Qty Limit: 100 mg = 1.5 tablets/day;200 mg = 2 tablets/day* *Maximum Daily Dose = 400 mg* ***(Max days supply = 30 days)*** Intuniv® (guanfacine extended release) Tablet *Qty Limit = 1 tablet/day* Strattera® (atomoxetine) *Qty Limit:10, 18, 25 and 40 mg = 2 capsules/day* *60, 80 and 100 mg = 1 capsule/day* *FDA maximum recommended dose = 100 mg/day* Xyrem® (sodium oxybate) oral solution *Qty Limit = 540 ml/30 days*	**Intuniv, Nuvigil, Provigil, Strattera:** patient must have a documented intolerance to the generic equivalent.

PREFERRED AGENTS (No PA required unless otherwise noted)	NON-PREFERRED AGENTS (PA required)	PA CRITERIA
Max days supply = 30 days)		
ALLERGEN IMMUNOTHERAPY		
	Oralair® *(QTY LIMIT = 1 tablet/day)*	**Clinical Criteria** • Patient age ≥10 years and ≤65 years • Prescriber must provide the testing to show that the patient is allergic to the components in the prescribed therapy and must provide a clinically valid rationale why single agent sublingual therapy is being chosen over subcutaneous therapy • Treatment must start 12 weeks before expected onset of pollen season and only after confirmed by positive skin test or in vitro testing for pollen-specific IgE antibodies for any of the 5 grass species contained in Oralair • Have an auto-injectable epinephrine on-hand •
ALPHA1-PROTEINASE INHIBITORS		
	Aralast NP® Glassia® Prolastin-C® Zemaira® **Maximum days supply per fill for all drugs is 14 days**	**Criteria for Approval:** The indication for use is treatment of alpha1 -proteinase inhibitor deficiency-associated lung disease when all of the following criteria are met: Patient's alpha1 -antitrypsin (ATT) concentration < 80 mg per dl [or < 11 micromolar] AND patient has obstructive lung disease as defined by a forced expiratory volume in one second (FEV1) OF 30 - 65% of predicted or a rapid decline in lung function defined as a change in FEV1 of > 120 mL/year. AND medication is being administered intravenously (inhalation administration will not be approved) AND patient is a non-smoker OR patient meets above criteria except lung function has deteriorated beneath above limits while on therapy.
ALZHEIMER'S MEDICATIONS		
CHOLINESTERASE INHIBITORS		
DONEPEZIL (compare to Aricept®) tablet *(QTY LIMIT = 1 tablet/day)* EXELON® (rivastigmine) Capsule *(QTY LIMIT = 2 capsules/day)*	Aricept® (donepezil) Tablet *(QTY LIMIT = 1 tablet/day)* Razadyne® (galantamine) Tablet Razadyne ER® (galantamine) Capsule	**Razadyne Tablet, Razadyne ER Capsule:** diagnosis or indication for the requested medication is Alzheimer's disease. AND patient has been started and stabilized on the requested medication (Note: samples are not considered adequate justification for stabilization) OR patient had a documented side

PREFERRED AGENTS (No PA required unless otherwise noted)	NON-PREFERRED AGENTS (PA required)	PA CRITERIA
DONEPEZIL ODT (compare to Aricept® ODT) *(QTY LIMIT = 1 tablet/day)* RIVASTIGMINE (compare to Exelon®) capsule *(QTY LIMIT = 2 capsules/day)* GALANTAMINE tablet (compare to Razadyne®) Tablet GALANTAMINE ER capsule (compare to Razadyne® ER) **SOLUTION** EXELON® (rivastigmine) Oral Solution **TRANSDERMAL** EXELON® (rivastigmine transdermal) Patch *(QTY LIMIT = 1 patch/day)*	Aricept® ODT (donepezil) *(QTY LIMIT = 1 tablet/day)* galantamine (compare to Razadyne®) Oral Solution Rivastigmine (compare to Exelon®) patch (QTY LIMIT = 1 patch/day)	effect, allergy or treatment failure to donepezil and Exelon. AND if the product has an AB rated generic, the patient has a documented intolerance to the generic. **Aricept:** diagnosis or indication for the requested medication is Alzheimer's disease. AND the patient has a documented intolerance to the generic product. **Galantamine Oral Solution:** diagnosis or indication for the requested medication is Alzheimer's disease. AND patient has been started and stabilized on the requested medication (Note: samples are not considered adequate justification for stabilization) OR the patient had a documented side effect, allergy or treatment failure to Exelon Oral Solution. **Rivastigmine Patch:** the patient has a documented intolerance to brand Exelon Patch. **Aricept ODT**diagnosis or indication for the requested medication is Alzheimer's disease. AND medical necessity for a specialty dosage form has been provided. AND the patient has a documented intolerance to the generic formulation.
NMDA RECEPTOR ANTAGONIST		
MEMANTINE Tablets NAMENDA® (memantine) Oral Solution	Namenda® (memantine) Tablet Namenda® XR (memantine ER) Oral Capsule *(QTY LIMIT = 1 capsule/day)*	**Namenda:** Patient has a documented intolerance to the generic. **Namenda XR:** Patient has not been able to tolerate twice daily dosing of immediate release memantine, resulting in significant clinical impact.
CHOLINESTERASE INHIBITOR/NMDA COMBINATION		
	Namzaric® (donepezil/memantine) Capsule (QTY LIMIT = 1 capsule/day)	**Namzaric:** Clinically compelling reason why the individual ingredients of donepezil and memantine cannot be used
COX-2 INHIBITORS		
Clinical PA Required CELECOXIB *(QTY LIMIT = 2 caps/day)*	Celebrex® (celecoxib) *(QTY LIMIT = 2 capsules/day)*	**Celebrex:** patient does not have a history of a sulfonamide allergy. AND patient has had a documented side effect, allergy, or treatment failure to two or more preferred generic NSAIDS and has had a previous trial of generic celecoxib. OR patient is not a candidate for therapy with a preferred generic NSAID due to one of the following: patient is 60 years of age or older, patient has a history of GI bleed and has had a previous trial of generic celecoxib, patient is currently taking an anticoagulant (warfarin or heparin) and has had a previous trial of generic celecoxib, Patient is currently taking an oral corticosteroid and has had a previous trial of generic celecoxib, and Patient is currently taking methotrexate and has had a previous trial of generic celecoxib.

PREFERRED AGENTS (No PA required unless otherwise noted)	NON-PREFERRED AGENTS (PA required)	PA CRITERIA
ANALGESICS		
MISCELLANEOUS: TOPICAL AND TRANSDERMAL PATCH		
Lidocaine 3% Cream Lidocaine 4% solution Lidocaine 5% Ointment, Cream Lidocaine/Prilocaine 2.5-2.5% Cream Synera® (lidocaine/tetracaine) patch	Lidocaine 5% patch (compare to Lidoderm®) *(QTY LIMIT = 3 patches/day)* Lidoderm® Patch (lidocaine 5 %) *(QTY LIMIT = 3 patches/day)* Qutenza® Patch (capsaicin 8 %) (*QTY LIMIT =4 patches/90 days)* Ztlido™ Patch (lidocaine 1.8%) (QTY LIMIT = 3 patches/day) (Note: Please refer to Analgesics: COX IIs and NSAIDs for topical NSAIDS)	**Lidoderm, Lidocaine Patch:** diagnosis or indication is neuropathic pain/post-herpetic neuralgia AND patient has had a documented side effect, allergy, treatment failure or contraindication to 2 drugs in the tricyclic antidepressant (TCA) class and/or anticonvulsant class OR patient has a medical necessity for a transdermal formulation (ex. dysphagia, inability to take oral medications), AND if the request is for brand Lidoderm, the patient has had a documented intolerance to the generic equivalent.. **Qutenza, Ztlido:** diagnosis or indication is post-herpetic neuralgia AND patient has had a documented side effect, allergy, treatment failure or contraindication to 2 drugs in the tricyclic antidepressant (TCA) class and/or anticonvulsant class as well as Lyrica and Lidocaine patch. OR patient has a medical necessity for transdermal formulation (ex. dysphagia, inability to take oral medications) AND patient has had a documented side effect, allergy, treatment failure or contraindication to Lidocaine patch.

OR is unable to use tablet or liquid formulations. **Abstral, Actiq, fentanyl transmucosal, Fentora, Lazanda, Subsys:** indication of cancer breakthrough pain AND patient is opioid tolerant AND is on a long acting opioid formulation AND is 18 years of age or older (Actiq 16 years of age or older) AND prescriber is registered in the Transmucosal Immediate Release Fentanyl (TIRF) Risk Evaluation and Mitigation Strategy (REMS) Access program AND member has had a documented treatment failure with or intolerance to 2 of the following 3 immediate release treatment options: morphine, hydromorphone or oxycodone. OR is unable to use tablet or liquid formulations AND if the request is for brand name Actiq, member has a documented intolerance to generic fentanyl transmucosal. **Dilaudid - 5 Oral Solution, Hydromorphone Oral Solution:** member has had a documented side effect, allergy or treatment failure with oxycodone oral solution and morphine oral solution OR has been started and stabilized on another dosage form of hydromorphone AND if the request is for the branded product, patient has a documented intolerance to the generic product. **Oxycodone (generic) Capsules:** member has a documented intolerance to generic oxycodone tablets. **Ultram, Ultracet:** member has a documented intolerance to the generic

PREFERRED AGENTS (No PA required unless otherwise noted)	NON-PREFERRED AGENTS (PA required)	PA CRITERIA
Dilaudid®) *(Qty Limit = 16 tablets/day)* MEPERIDINE (compare to Demerol®) (30 tabs or 5 day supply) MORPHINE SULFATE MORPHINE SULFATE (compare to Roxanol®) OXYCODONE (plain) *(For tablets, Qty Limit = 12 tablets/day)* OXYCODONE (w/acetaminophen, w/aspirin or w/ibuprofen) TRAMADOL (compare to Ultram®) *(Qty Limit = 8 tablets/day) (Age ≥ 16)* TRAMADOL/APAP (compare to Ultracet®) *(Qty Limit = 8 tablets/day)* (Age ≥18)	Lazanda® (fentanyl) Nasal Spray Lortab®*(hydrocodone w/ acetaminophen) Meperidine (Qty > 30 tabs or 5 day supply) Nucynta® (tapentadol) Opana® (oxymorphone) Oxycodone (plain) capsules (Qty limit = 12 capsules/day) Oxymorphone (compare to Opana®) Pentazocine w/acetaminophen Pentazocine w/naloxone Roxanol®*(morphine sulfate) Roxybond™ (oxycodone) Subsys® (fentanyl) Sublingual Spray Tylenol® #3*,#4*(acetaminophen w/codeine) Ultracet® (tramadol w/ acetaminophen) (Qty Limit = 8 tablets/day) Ultram®* (tramadol) (Qty Limit = 8 tablets/day)	formulation **Other Short acting Opioids:** member has had a documented side effect, allergy, or treatment failure to at least 3 medications not requiring prior approval. (If a product has an AB rated generic, one trial must be the generic) **PA Requests to Exceed QTY LIMIT for Oxycodone IR or Hydromorphone IR:** if dose consolidation is not possible (i.e. use of higher strength dosage form), all requests will be referred to the DVHA Medical Director for review unless the medication is being prescribed for pain related to an oncology diagnosis which will be approved by the Clinical Call Center. **Limitations:** APAP containing products: daily doses that result in > 4 grams of acetaminophen/day will reject for PA; Meperidine 75mg/ml injection no longer available - 25mg/ml, 50mg/ml and 100mg/ml available. Brand name Demerol 75mg/ml and 100mg/2ml not covered - no generic equivalents. `
OPIOIDS: LONG ACTING		
TRANSDERMAL BUTRANS (buprenorphine) TRANSDERMAL SYSTEM *(QTY LIMIT = 2 patches/14 days) (Maximum 14-day fill)* FENTANYL PATCH (compare to Duragesic®) 12 mcg/hr, 25 mcg/hr, 50 mcg/hr (*QTY LIMIT=15 patches/30 days)* 75 mcg/hr, 100 mcg/hr (*QTY LIMIT=30 patches/30 days)* **BUCCAL** All Products require PA **ORAL** MORPHINE SULFATE CR 12 hr tablet (compare to MS Contin® (*QTY LIMIT=90 tablets/strength/30 days)*	Buprenorphine patch (compare to Butrans®) (QTY LIMIT = 2 patches/14 days) (Maximum 14-day fill) Duragesic®* (fentanyl patch) 12 mcg/hr, 25 mcg/hr, 50 mcg/hr (QTY LIMIT=15 patches/30 days) 75 mcg/hr, 100 mcg/hr (QTY LIMIT= 30 patches/30 days) Fentanyl patch 37.5mcg/hr, 62.5mcg/hr, 87.5mcg/hr Belbuca® (buprenorphine hcl buccal film) (*QTY LIMIT= 28 films/14 days, Maximum 14-day fill)* hydromorphone XR tablet (QTY LIMIT= 30 tablets/30 days (8 mg, 12 mg, 16 mg tabs)) Dolophine® (methadone) tablets	**CLINICAL CONSIDERATIONS:** Long acting opioid dosage forms are intended for use in opioid tolerant patients only. These tablet/capsule/topical medication strengths may cause fatal respiratory depression when administered to patients not previously exposed to opioids. LA opioids should be prescribed for patients with a diagnosis or condition that requires a continuous, around-the-clock analgesic. LA opioids should be reserved for use in patients for whom alternative treatment options (e.g., non-opioid analgesics or immediate-release opioids) are ineffective, not tolerated, or would be otherwise inadequate to provide sufficient management of pain. LA opioids are NOT intended for use as 'prn' analgesic. LA opioids are NOT indicated for pain in the immediate post-operative period (the first 12-24 hours following surgery) or if the pain is mild, or not expected to persist for an extended period of time. LA opioids are not intended to be used in a dosage frequency other than FDA approved regimens. Patients should not be using other extended release opioids prescribed by another physician. Prescribers should consult the VPMS (Vermont Prescription Monitoring System) to review a patient's Schedule II - IV medication use before prescribing long acting opioids. **Belbuca Films, Buprenorphine Patch:** the patient has had a documented intolerance to Butrans patches **Duragesic Patches:** patient has had a documented intolerance to generic fentanyl patches. **Fentanyl patches 37.5mcg/hr, 62.5mcg/hr, 87.5mcg/hr:** provider must submit clinical rationale detailing why the patient is unable to use a combination of the preferred strengths.

PREFERRED AGENTS (No PA required unless otherwise noted)	NON-PREFERRED AGENTS (PA required)	PA CRITERIA
	Methadone (compare to Dolophine®) 5 mg, 10 mg tablets Methadone oral solution (no PA required for patient less than 1 year old) Methadone oral concentrate 10 mg/ml ****Maximum initial daily dose all products = 30 mg/day**** Kadian® (morphine sulfate XR*) (QTY LIMIT= 60 capsules/strength/30 days)* MS Contin®* (morphine sulfate CR 12 hr) Tablets *(QTY LIMIT=90 tablets/strength/30 days)* Morphine sulfate SR 24hr capsule (compare to Kadian®) *(QTY LIMIT= 60 capsules/strength/30 days)* Morphine sulfate SR beads 24hr capsule *(QTY LIMIT 30 capsules/strength/30 days)* Oxycodone ER (compare to OxyContin®) *(QTY LIMIT= 90 tablets/strength/30 days)* Oxymorphone ER *(QTY LIMIT=60 tablets/strength/30 days)* Nucynta ER® (tapentadol ER) *(QTY LIMIT=2 tablets/day)* Conzip® (tramadol ER biphasic release) Capsule *(QTY LIMIT = 1 capsule/day)* Tramadol SR (compare to Ultram ER®) *(Qty Limit = 1 tablet/day)* Tramadol ER biphasic-release® Capsule *(Qty Limit = 1 capsule/day) (150 mg strength)* Tramadol ER biphasic-release tablet (formerly Ryzolt®) *(Qty Limit = 1 tablet/day)* Zohydro ER® (hydrocodone bitartrate)	**Methadone Tablet:** patient has had a documented side effect, allergy, or treatment failure to morphine sulfate CR 12 hr tablets AND the initial methadone daily dose does not exceed 30mg AND for approval of brand Dolophine tablets, the patient must have a documented intolerance to the equivalent generic tablet. (Note: Methadone products, when used for treatment of opioid addiction in detoxification or maintenance programs, shall be dispensed ONLY by certified opioid treatment programs as stipulated in 42 CFR 8.12, NOT retail pharmacy) **Methadone Liquid:** Patient must have a medical necessity for an oral liquid (i.e. swallowing disorder, inability to take oral medications) AND the initial daily dose does not exceed 30mg OR patient has been started and stabilized on the requested oral liquid medicationNote: Methadone products, when used for treatment of opioid addiction in detoxification or maintenance programs, shall be dispensed ONLY by certified opioid treatment programs as stipulated in 42 CFR 8.12, NOT retail pharmacy **Conzip, Tramadol ER biphasic-release Capsule, Tramadol ER biphasic-release Tablet, Tramadol ER/SR:** member has had a documented treatment failure to a preferred short-acting tramadol product. In addition, for approval of tramadol ER biphasic-release capsule or tablet orthe patient must have a documented intolerance to generic tramadol ER/SR. **Oral Non-Preferred (except methadone & tramadol containing products):** the patient has had a documented side effect, allergy, or treatment failure to morphine sulfate CR 12hr tablet (generic) AND generic fentanyl patch. (If a product has an AB rated generic, there must have been a trial of the generic). AND the patient must have a documented side effect, allergy, or treatment failure to the preferred abuse deterrent formulation (Embeda) before Arymo ER, Morphabond ER, OxyContin or Xtampza ER will be approved. **Hysingla ER/Zohydro ER:** Available with PA for those unable to tolerate any preferred medications. All requests will go to the DVHA Medical Director for approval. **Limitations:** Methadone 40mg dispersible tablet not approved for retail dispensing.

If a product has an AB rated generic, one trial must be the generic.
THIAZOLIDINEDIONES & COMBINATIONS		

PREFERRED AGENTS (No PA required unless otherwise noted)	NON-PREFERRED AGENTS (PA required)	PA CRITERIA
Preferred After Clinical Criteria Are Met PIOGLITAZONE (compare to Actos®) **COMBINATION** All products require PA	Actos® (pioglitazone) Avandia® (rosiglitazone) Actoplus Met® (pioglitazone/metformin) Duetact® (pioglitazone/glimepiride) *(Quantity Limit = 1 tablet/day*) Pioglitazone/Glimeperide (compare to Duetact®) Quantity Limit = 1 tab/day Pioglitazone/Metformin (Compare to Actoplus Met)	**Actos, Pioglitazone:** Patient has been started and stabilized on the requested medication OR patient has had a documented side effect, allergy, contraindication OR treatment failure with metformin AND for approval of Actos, the patient has a documented intolerance to the generic equivalent. **Avandia:** patient has been started and stabilized on the requested medication and appears to be benefiting from it and the patient acknowledges that they understand the risks OR patient is unable to achieve glycemic control using other medications (including a documented side effect, allergy, contraindication or treatment failure with metformin). **Actoplus Met, Duetact, Pioglitazone/Metformin, Pioglitazone/Glimepiride:** patient is unable to take as the individual separate agents AND if the request is for Actoplus Met or Duetact, the patient has had a documented intolerance to the generic equivalent.
ANTI-EMETICS		
5HT3 ANTAGONISTS: Length of Authorization: 6 months for chemotherapy or radiotherapy; 3 months for hyperemesis gravadarum, 1 time for prevention of post-op nausea/vomiting: see clinical criteria. Monthly quantity limits apply, PA required to exceed.		
ONDANSETRON Injection (vial and premix) ONDANSETRON†tablet *Quantity Limit= 3 tabs/day, maximum of 30 days per fill* ONDANSETRON ODT *Quantity Limit= 3 tabs/day, maximum of 30 days per fill*	Akynzeo® (nutupitant/palonosetron) Anzemet® (dolansetron) 50 mg (4 tabs/28 days) Anzemet® (dolansetron) 100 mg (2 tabs/28 days) Granisetron 1 mg (6 tabs/28 days) Granisetron Injectable Ondansetron (generic) Oral Solution 4 mg/5 ml Sancuso® 3.1 mg/24 hrs Transdermal Patch (granisetron) (Qty Limit = 4 patches/28 days) Sustol® (granisetron) injection 10mg/0.4ml QTY LIMIT = 4 injections per 28 days Zofran®* (ondansetron) Injection Zofran®* (ondansetron) Oral Tablets and ODT 4 mg (12 tabs/28 days), 8 mg (6 tabs/28 days) Zofran® (ondansetron) Oral Solution 4 mg/5 ml Zuplenz® (ondansetron) Oral Soluble Film *(Quantity Limit =12 films/28 days (4 mg), 6 films/28 days (8 mg))*	**Akynzeo:** Has a diagnosis of nausea and vomiting associated with cancer chemotherapy AND patient has a documented side effect, allergy, or treatment failure of a regimen consisting of a 5-HT3 antagonist, an NK1 antagonist, and dexamethasone **Anzemet, Granisetron:** has a diagnosis of nausea and vomiting associated with cancer chemotherapy. AND patient has had a documented side effect, allergy, or treatment failure to generic ondansetron. **Zofran:** patient must have a documented intolerance to the corresponding generic ondansetron product (tablets, orally disintegrating tablets (ODT), oral solution or injection). If the request is for oral solution, the patient must be unable to use ondansetron ODT or ondansetron tablets. **Ondansetron Oral Sol:** patient is unable to use ondansetron ODT or ondansetron tablets. **Sancuso:** patient has a diagnosis of nausea and vomiting associated with cancer chemotherapy. AND prescriber provides documentation of medical necessity for the transdermal formulation. OR patient has had a documented side effect, allergy or treatment failure with generic ondansetron. **Sustol:** Patient has a diagnosis of nausea and vomiting associated with cancer chemotherapy or radiotherapy AND prescriber provides documentation of medical necessity for the specialty dosage form (i.e. inability to swallow tablets, dysphagia) AND the patient has a documented side effect, allergy, or treatment failure with Ondansetron injection and Sancuso transdermal. **Zuplenz:** patient has a diagnosis of nausea and vomiting associated with cancer chemotherapy or radiotherapy. AND prescriber provides documentation of medical necessity for the specialty dosage form (i.e. inability to swallow

PREFERRED AGENTS (No PA required unless otherwise noted)	NON-PREFERRED AGENTS (PA required)	PA CRITERIA
		tablets, dysphagia) AND a clinical rationale as to why ondansetron ODT is not a suitable option for the patient. **CRITERIA FOR APPROVAL (to exceed quantity limit):** **Zuplenz:** For nausea and vomiting associated with chemotherapy or radiation therapy, 3 tablets for each day of chemotherapy/radiation and 3 tablets for each day for 2 days after completion of chemotherapy/radiation may be approved. **Anzemet:** For nausea and vomiting associated with chemotherapy, 1 tablet for each day of chemotherapy and 1 tablet for 2 days after completion of chemotherapy may be approved. **Granisetron:** For nausea and vomiting associated with chemotherapy, 2 tablets for each day of chemotherapy and 2 tablets for 2 days after completion of chemotherapy may be approved. OR For nausea and vomiting associated with radiation therapy, 2 tablets for each day of radiation may be approved. **Sancuso:** For nausea and vomiting associated with chemotherapy, 1 patch for each chemotherapy cycle may be approved. **Limitations:** Aloxi and Anzemet injection are not considered outpatient medications and are not covered in the pharmacy benefit.
MISCELLANEOUS (PREGNANCY)		
	Bonjesta® (20mg doxylamine succinate and 20mg pyridoxine hydrochloride ER tablet) *(QTY LIMIT= 2 tablets/day)* Diclegis® (10 mg doxylamine succinate and 10 mg pyridoxine hydrochloride) DR tablet *(QTY LIMIT= 4 tablets/day)*	**Bonjesta:** Patient has a diagnosis of nausea and vomiting of pregnancy AND Patient has tried and had an inadequate response to conservative management (i.e. change in dietary habits, ginger, or acupressure), generic doxylamine and generic pyridoxine (Vitamin B6) used in combination, ondansetron, and Diclegis. **Diclegis:** Patient has a diagnosis of nausea and vomiting of pregnancy AND Patient has tried and had an inadequate response to conservative management (i.e. change in dietary habits, ginger, or acupressure) AND Patient has tried and had an inadequate response to generic doxylamine and generic pyridoxine (Vitamin B6) AND Patient has tried and had an inadequate response to generic ondansetron.
NK1 ANTAGONISTS		
Preferred After Clinical Criteria Are Met EMEND® (aprepitant) 40 mg (1 cap/28 days) EMEND® (aprepitant) 80 mg (2 caps/28 days) EMEND® (aprepitant) 125 mg (1 cap/28 days) EMEND® (aprepitant) Tri-fold Pack (1 pack/28 days)	Aprepitant (compare to Emend®) 40 mg (1 cap/28 days) Aprepitant (compare to Emend®) 80 mg (2 caps/28 days) Aprepitant (compare to Emend®) 125 mg (1 cap/28 days) Cinvanti® (aprepitant) Emend® (aprepitant) oral suspension Varubi® (rolapitant) *Quantity Limit = 4 tabs/ 28 days*	**Cinvanti:** medication will be prescribed by an oncology practitioner. AND patient requires prevention of nausea and vomiting associated with moderate to highly emetogenic cancer chemotherapy. AND The requested quantity does not exceed 1 dose (130mg, 18ml) per course of chemotherapy. Note: Cinvanti will be approved as a medical benefit ONLY and will NOT be approved if billed through pharmacy point of sale. **Aprepitant, Emend (aprepitant) 80 mg, 125 mg, and Tri-Fold pack:** medication will be prescribed by an oncology practitioner. AND patient requires prevention of nausea and vomiting associated with moderate to highly emetogenic cancer chemotherapy. AND The requested quantity does not exceed one 125 mg and two 80 mg capsules OR one Tri-Fold Pack per course of chemotherapy. Patients with multiple courses of chemotherapy per 28 days will be approved quantities sufficient for the number of courses of chemotherapy. For approval of generic aprepitant, the patient must have a documented intolerance to brand Emend. **Emend 40mg:** patient requires prevention of postoperative nausea and vomiting.

PREFERRED AGENTS (No PA required unless otherwise noted)	NON-PREFERRED AGENTS (PA required)	PA CRITERIA
		AND The requested quantity does not exceed one 40 mg capsule per surgery or course of anesthesia. Patients with multiple surgeries or courses of anesthesia in a 28-day period will be approved quantities sufficient for the number of surgeries or courses of anesthesia. **Emend oral suspension:** medication will be prescribed by an oncology practitioner AND patient requires prevention of nausea and vomiting associated with moderate to highly emetogenic cancer chemotherapy **AND** patient has a documented medical necessity for the specialty dosage form (e.g. swallowing disorder) **Varubi:** Medication will be prescribed by an oncology practitioner AND patient requires prevention of nausea and vomiting associated with moderate to highly emetogenic cancer chemotherapy AND the requested quantity does not exceed 4 tablets per 28 days AND the patient has had a documented side effect, allergy, or treatment failure with Emend®.
THC DERIVATIVES		
All products require PA	Dronabinol (compare to Marinol®) Marinol® (dronabinol) Cesamet® (nabilone) Syndros™ (dronabinol) oral solution	**Pharmacology:** Marinol® is a schedule III cannabinoid agent containing the same active ingredient, tetrahydrocannabinol, as marijuana. While its exact mechanism of action is unknown, it is speculated to inhibit medullary activity as well as suppress prostaglandin and endorphan synthesis. Cesamet® is a schedule II synthetic cannabinoid that acts by activating the endocannabinoid receptors, CB1 and CB2, which are involved in nausea/vomiting regulation. Both Marinol® and Cesamet® are FDA-approved for use in chemotherapy associated nausea and vomiting refractory to conventional antiemetics. In addition, Marinol® is indicated for patients with HIV/AIDS-related anorexia or wasting syndrome. **Dronabinol/Marinol:** patient has a diagnosis of chemotherapy-induced nausea/vomiting AND patient has had a documented side effect, allergy, or treatment failure to at least 2 antiemetic agents, of which, one must be a preferred 5HT3 receptor antagonist. If the request is for Marinol, the patient must additionally have a documented intolerance to generic dronabinol. OR patient has a diagnosis of HIV/AIDS associated anorexia. AND patient has had an inadequate response, adverse reaction, or contraindication to megestrol acetate. If the request is for Marinol, the patient must additionally have a documented intolerance to generic dronabinol. **Syndros:** patient must meet criteria as listed above for dronabinol AND patient has a requirement for an oral liquid dosage form (i.e. swallowing disorder, inability to take oral medications) **Cesamet:** patient has a diagnosis of chemotherapy-induced nausea/vomiting AND patient has had a documented side effect, allergy, or treatment failure to at least 2 antiemetic agents, of which, one must be a preferred 5HT3 receptor antagonist.
ANTI-HYPERTENSIVES		
ACE INHIBITORS		
BENAZEPRIL (compare to Lotensin®)	Accupril® (quinapril)	**Epaned Oral Solution (Patients > 12 years old):** patient has a requirement for an oral liquid dosage form (i.e. swallowing disorder, inability to take oral

PREFERRED AGENTS (No PA required unless otherwise noted)	NON-PREFERRED AGENTS (PA required)	PA CRITERIA
ENALAPRIL (compare to Vasotec®) EPANED® (enalapril) oral solution (age < 12 years old) FOSINOPRIL LISINOPRIL (compare to Zestril®, Prinivil®) QUINAPRIL (compare to Accupril®) RAMIPRIL (compare to Altace®) TRANDOLAPRIL	Altace® (Ramipril) Captopril Epaned® (enalapril) oral solution (age ≥ 12 years old) Lotensin® (benazepril) perindopril Moexepril Prinivil® (lisinopril) Qbrelis® (Lisinopril) 1mg/ml solution Vasotec® (enalapril) Zestril® (lisinopril)	medications). **Qbrelis Oral Solution:** patient has a requirement for an oral liquid dosage form (i.e. swallowing disorder, inability to take oral medications) AND has a side effect, allergy, or treatment failure to Epaned oral solution. **Other ACE Inhibitors:** patient has had a documented side effect, allergy, or treatment failure to all available preferred generic ACEI. If a medication has an AB rated generic, there must have been a trial of the generic formulation.
ACE INHIBITOR W/ HYDROCHLOROTHIAZIDE		
BENAZEPRIL/HYDROCHLOROTHIAZIDE (compare to Lotensin HCT®) CAPTOPRIL/HYDROCHLOROTHIAZIDE ENALAPRIL/HYDROCHLOROTHIAZIDE (compare to Vaseretic®) FOSINOPRIL/HYDROCHLOROTHIAZIDE LISINOPRIL/HYDROCHLOROTHIAZIDE (compare to Zestoretic®) MOEXIPRIL/HYDROCHLOROTHIAZIDE QUINAPRIL/HYDROCHLOROTHIAZIDE (compare to Accuretic®)	Accuretic®* (quinapril/HCTZ) Lotensin HCT®* (benazepril/HCTZ) Vaseretic®* (enalapril/HCTZ) Zestoretic®* (lisinopril/HCTZ)	**ACE Inhibitor/Hydrochlorothiazide combinations:** patient has had a documented side effect, allergy, or treatment failure to all available preferred generic ACEI/Hydrochlorothiazide combination. If a medication has an AB rated generic, there must have been a trial of the generic formulation.
ACE INHIBITOR W/CALCIUM CHANNEL BLOCKER		
AMLODIPINE/BENAZEPRIL (compare to Lotrel®)	Lotrel®* amlodipine/(benazepril) Prestalia® (perindopril/amlodipine) Trandolapril/Verapamil ER(compare to Tarka®) Tarka® (trandolopril/verapamil)	**Lotrel:** The patient has had a documented side effect, allergy, or treatment failure to the generic formulation. **Prestalia, Tarka, Trandolapril/Verapamil ER:** The patient has had a documented side effect, allergy, or treatment failure to amlodipine/benazepril AND the patient is unable to take as the individual separate agents.
ANGIOTENSIN RECEPTOR BLOCKERS (ARBs)		
IRBESARTAN (compare to Avapro®) LOSARTAN (compare to Cozaar®) MICARDIS® (telmisartan) OLMESARTAN (compare to Benicar®) VALSARTAN (compare to Diovan®)	Avapro® (irbesartan) Benicar® (olmesartan) candesartan Cozaar® (losartan) Diovan® (valsartan) Edarbi® (azilsartan) Tablet *(Qty Limit = 1 tablet/day)*	**Avapro, Benicar, Candesartan, Cozaar, Diovan, Edarbi, Eprosartan, and Telmisartan:** Patient has had a documented side effect, allergy, or treatment failure with TWO a preferred Angiotensin Receptor Blocker (ARB) or ARB combinations. AND If brand name product with generic available, the patient has had a documented intolerance with the generic product.

PREFERRED AGENTS (No PA required unless otherwise noted)	NON-PREFERRED AGENTS (PA required)	PA CRITERIA
	Eprosartan Telmisartan (compare to Micardis®)	
ANGIOTENSIN RECEPTOR BLOCKER/DIURETIC COMBINATIONS		
IRBESARTAN/HYDROCHLOROTHIAZIDE (compare to Avalide®) LOSARTAN/HYDROCHLOROTHIAZIDE (compare to Hyzaar®) VALSARTAN/HYDROCHLOROTHIAZIDE (compare to Diovan HCT®)	Avalide® (irbesartan/hydrochlorothiazide) Benicar HCT® (olmesartan/hydrochlorothiazide) candesartan/hydrochlorothiazide Diovan HCT® (valsartan/hydrochlorothiazide) Edarbyclor® (azilsartan/chlorthalidone) Tablet *(Qty Limit = 1 tablet/day)* Micardis HCT® (telmisartan/hydrochlorothiazide) Hyzaar® (losartan/hydrochlorothiazide) Telmisartan/hydrochlorothiazide (compare to Micardis HCT®)	**Avalide, Benicar HCT, candesartan/HCTZ, Diovan HCT, Edarbyclor, Hyzaar, Micardis HCT and Telmisartan/HCTZ:** patient has had a documented side effect, allergy, or treatment failure with a preferred ARB/Hydrochlorothiazide combination AND If brand name product with generic available, the patient has had a documented intolerance with the generic product.
ANGIOTENSIN RECEPTOR BLOCKER/CALCIUM CHANNEL BLOCK COMBINATIONS		
VALSARTAN/AMLODIPINE (compare to Exforge®) *(QTY LIMIT= 1tab/day)*	Azor®(olmesartan/amlodipine) *(QTY LIMIT = 1 tablet/day)* amlodipine/telmisartan (compare to Twynsta®) *(QTY LIMIT = 1 tablet/day)* Exforge® (valsartan/amlodipine) *(QTY LIMIT = 1 tab/day)* Olmesartan/amlodipine (compare to Azor®) Twynsta® (amlodipine/telmisartan) *(QTY LIMIT = 1 tablet/day)*	**Azor, Amlodipine/Telmisartan, Exforge, Olmesartan/amolodipine, Olmesartan/amlodipine/HCTZ and Twynsta:** The patient has had a documented side effect, allergy, or treatment failure to Valsartan/amlodipine.
ANGIOTENSIN RECEPTOR BLOCKER/CALCIUM CHANNEL BLOCKER/HCTZ COMBO		
Valsartan/Amlodipine/HCTZ (compare to Exforge HCT®) (QTY LIMIT = 1tablet/day)	Exforge HCT® (amlodipine/valsartan/hydrochlorothiazide) *(QTY LIMIT = 1 tablet/day)* Tribenzor® (amlodipine/olmesartan/hydrochlorothiazide) *(QTY LIMIT = 1 tablet/day)*	**Exforge HCT, Tribenzor:** patient has had a documented side effect, allergy, or treatment failure to Valsartan/amlodipine/HCTZ.
ANGIOTENSIN RECEPTOR BLOCKER/MISCELLANEOUS COMBINATIONS		
Preferred Agent After Clinical Criteria Is Met ENTRESTO® (valsartan/sacubitril)	Byvalson® (Nebivolol/Valsartan)	**Entresto:** Age ≥ 18 years of age AND Diagnosis of chronic heart failure NYHA Class II-IV with reduced ejection fraction.

PREFERRED AGENTS (No PA required unless otherwise noted)	NON-PREFERRED AGENTS (PA required)	PA CRITERIA
(QTY LIMIT = 2 tabs/day)		**Byvalson:** The patient must have a documented side effect, allergy, or treatment failure to at least 3 preferred beta blockers and a preferred ARB used in combination AND is unable to take Bystolic and valsartan as the individual separate agents.
BETA BLOCKERS		
SINGLE AGENT ACEBUTOLOL ATENOLOL (compare to Tenormin®) BISOPROLOL FUMARATE CARVEDILOL (compare to Coreg® LABETALOL (compare to Trandate®) METOPROLOL TARTRATE (compare to Lopressor®) METOPROLOL SUCCINATE XL (compare to Toprol XL®) PINDOLOL PROPRANOLOL PROPRANOLOL ER (compare to Inderal LA®) SOTALOL (compare to Betapace®, Betapace AF®)	Betapace® (sotalol) Betapace AF® (sotalol) Betaxolol Bystolic® (nebivolol) *(QTY LIMIT = 1 tablet/day for 2.5 mg, 5 mg and 10 mg tablet strengths, 2 tablets/day for 20 mg tab)* Carvedilol CR (compare to Coreg®) *QTY LIMIT = 1 tablet/day* Coreg® (carvedilol) Coreg CR® (carvedilol CR) *(QTY LIMIT = 1 tablet/day* Corgard® (nadolol) Hemangeol® oral solution (propranolol) Inderal LA® (propranolol ER) Inderal XL® (propranolol SR) Innopran XL® (propranolol SR) Kapspargo Sprinkle™ (metoprolol succinate XL) Lopressor® (metoprolol tartrate) Nadolol Sorine® (sotalol) Tenormin® (atenolol) Timolol Toprol XL® (metoprolol succinate XL)	**Non-preferred drugs (except as noted below)** patient has had a documented side effect, allergy, or treatment failure to at least three preferred drugs. (If a medication has an AB rated generic, one trial must be the generic formulation.) **Carvedilol CR, Coreg CR:** Indication: Heart Failure: patient has been started and stabilized on the medication. (Note: Samples are not considered adequate justification for stabilization.) OR patient has had a documented side effect, allergy, or treatment failure to metoprolol SR or bisoprolol. AND patient has been unable to be compliant with or tolerate twice daily dosing of carvedilol IR. Indication; Hypertension: patient has been started and stabilized on the medication. (Note: Samples are not considered adequate justification for stabilization.) OR patient has had a documented side effect, allergy, or treatment failure to 3(three) preferred anti-hypertensive beta-blockers. **Hemangeol:** indication for use is the treatment of proliferating infantile hemangioma **Kapspargo:** patient is unable to take a solid oral dosage form and has a treatment failure with an immediate release oral solution or crushed tablets.
BETA-BLOCKER/DIURETIC COMBINATION ATENOLOL/CHLORTHALIDONE (compare to Tenoretic®) BISOPROLOL/HYDROCHLOROTHIAZIDE (compare to Ziac®) METOPROLOL/HYDROCHLOROTHIAZIDE	Corzide® (nadolol/bendroflumethiazide) Nadolol/bendroflumethiazide (compare to Corzide®) Propranolol/HCTZ Tenoretic® (atenolol/chlorthalidone) Ziac® (bisoprolol/HCTZ)	
CALCIUM CHANNEL BLOCKERS

		the request is for Avelox, the patient has had a documented intolerance to generic moxifloxacin. **Levaquin (brand):** patient has a documented intolerance with the generic levoflocacin **Ofloxacin:** patient has had a documented side effect, allergy, or treatment failure to ciprofloxacin or levofloxacin
RIFAMYCINS		
All products require PA	Xifaxan ® (rifaximin) 200 mg Tablets *(Qty Limit depends on indication)* Xifaxan ® (rifaximin) 550 mg Tablets *(Qty Limit depends on indication)*	**Criterial for Approval: Based on Indication:** **Hepatic Encephalopathy (Xifaxan 550 mg Tablets Only):** patient has a diagnosis of hepatic encephalopathy. AND Patient has had a documented side effect, allergy, treatment failure or contraindication to lactulose. AND Quantity limit is 2 tablets/day (550 mg tablets only). **Traveller's Diarrhea (Xifaxan 200 mg Tablets Only**): patient has a diagnosis of traveller's diarrhea caused by noninvasive strains of Escherichia coli. AND Patient has had a documented side effect, allergy, treatment failure or contraindication with a fluoroquinolone. AND Quantity limit is 9 tablets/RX (200 mg tablets only). **Small Intestinal Bacterial Overgrowth (Xifaxan 550 mg or 200 mg Tablets:** patient has a diagnosis of SIBO. AND Patient has attempted dietary modification and has had a documented side effect, allergy, treatment failure or contraindication to metronidazole or neomycin AND Quantity limit is 800 mg to 1,200 mg/day. **Irritable Bowel Syndrome (Xifaxan 550 mg or 200 mg Tablets):** patient has a diagnosis of irritable bowel syndrome without constipation or with symptoms of bloating. AND Patient has attempted dietary modification and has had a documented side effect, allergy, treatment failure or contraindication to two of the following classes (one of which must be an antibiotic): • Antibiotics (alone or in combination: amoxicillin-clavulanate, cephalosporin, metronidazole, fluoroquinolone, tetracycline, trimethoprim-sulfamethoxazole) • SSRIs • TCAs • Antispasmodics • Antidiarrheals • Cholestyramine resin AND Quantity limit is 1,200 mg to 1,650 mg/day. **Inflammatory Bowel Disease: Crohn's Disease (Xifaxan 550 mg or 200 mg Tablets):** patient has a diagnosis of Crohn's Disease. AND Patient has had a documented side effect, allergy, treatment failure or contraindication to two of the following: 6-mercaptopurine, aminosalicylates, azathioprine, corticosteroids, fluoroquinolone and/or metronidazole. AND Quantity limit is 600 mg to 1,600 mg/day. **Inflammatory Bowel Disease: Ulcerative Colitis (Xifaxan 200 mg Tablets):** patient has a diagnosis of Ulcerative Colitis. AND Patient has had a documented side effect, allergy, treatment failure or contraindication to two of the following: 6-mercaptopurine, aminosalicylates, azathioprine,

PREFERRED AGENTS (No PA required unless otherwise noted)	NON-PREFERRED AGENTS (PA required)	PA CRITERIA
		corticosteroids, fluoroquinolone and/or metronidazole. AND Quantity limit is 800 mg/day (4 x 200 mg tablets/day). **Clostridium difficile Diarrhea (Xifaxan 200 mg Tablets):** patient has a diagnosis of C. difficile diarrhea. AND Patient has had a documented side effect, allergy, treatment failure or contraindication to metronidazole. AND Quantity limit is 800 mg/day (4 x 200 mg tablets/day).
TETRACYCLINES		
DOXYCYCLINE MONOHYDRATE 50MG, 100MG CAPS, TABS DOXYCYCLINE HYCLATE 50MG, 100MG CAPS, TABS DOXYCYCLINE MONOHYDRATE SUSP 25MG/5ML MINOCYCLINE 50MG, 100MG CAPS	Adoxa®* (doxycycline monohydrate) 150mg tab Doryx (doxycycline hyclate) tabs Doxycycline 75mg, 150mg caps, tabs Oracea® (doxycycline monohydrate) 40mg cap Vibramycin®* (doxycycline hyclate) cap, suspension Vibramycin® (doxycycline calcium) syrup Minocycline 50mg, 75mg, 100mg tabs Solodyn®(minocycline) tabs ER Tetracycline 250mg, 500mg cap Ximino® (minocycline) caps ER All other brands	**Non-preferred doxycycline/minocycline products (except as listed below):** patient has had a documented side effect, allergy, or treatment failure with a preferred doxycycline/minocycline. If a product has an AB rated generic, the trial must be the generic formulation. **Oracea:** patient has a diagnosis of Rosacea AND patient has had a documented side effect, allergy, or treatment failure with both a preferred doxycycline and minocycline. **Solodyn/Ximino:** patient is ≥ 12 years of age AND indication is to treat non-nodular inflammatory lesions of acne vulgaris AND patient has had a documented side effect, allergy, or treatment failure with a preferred minocycline. **Note:** no effect has been demonstrated on non-inflammatory acne lesions. **Vibramycin Suspension, Syrup:** patient has a medical necessity for a liquid dosage form AND a documented failure of preferred doxycycline suspension. **Tetracycline:** patient has had a documented side effect, allergy, or treatment failure with at least two preferred products OR the indication for use is the treatment of H. Pylori infection and the patient has a contraindication or treatment failure to clarithromycin.
VANCOMYCIN		
All products require PA IV vancomycin products are not managed at this time	Firvanq™ (vancomycin HCl) powder for oral solution QTY LIMIT = 1 bottle (150ml) per course of therapy. If more than 150ml is required, use of 300ml bottle is required. Vancocin® (vancomycin) Capsules Vancomycin (compare to Vancocin®) Capsules	**Criteria for Approval:** patient's diagnosis or indication is enterocolitis caused by Staphylococcus aureus. OR patient's diagnosis or indication is antibiotic-associated pseudomembranous colitis caused by Clostridium AND For approval of brand Vancocin, the patient must meet the above criteria and have a documented intolerance to the generic.
ANTI-INFECTIVES ANTIFUNGAL		
ALLYLAMINES		
TERBINAFINE tabs (compare to Lamisil®) *QTY LIMIT = 30 tablets/month (therapy limit of 90*	Griseofulvin Microsize Tablets Griseofulvin Ultramicrosize Tablets	**Griseofulvin Microsize Tabs/Griseofulvin Ultramicrosize:** patient has had a documented side effect, allergy, or treatment failure with terbinafine tablets and a preferred formulation of griseofulvin.

AND patient has a documented intolerance to generic famciclovir. **Sitavig:** patient has a diagnosis of recurrent herpes labialis (cold sores). AND patient is immunocompetent AND patient has a documented side effect or treatment failure with acyclovir AND valacyclovir. **Valtrex:** patient has a documented intolerance to generic valacyclovir
INFLUENZA MEDICATIONS		
Preferred After Clinical Criteria Are Met OSELTAMIVIR (compare to Tamiflu®) QTY LIMIT=10 capsules/30 days (45 mg & 75 mg caps) 20 capsules / 30 days (30 mg caps) 180 ml (6 mg/ml) / 30 days (suspension) RELENZA® (zanamivir) *QTY LIMIT= 20 blisters / 30 days* TAMIFLU® (oseltamivir) *QTY LIMIT=10 capsules/30 days(45 mg & 75 mg caps) 20 capsules / 30 days (30 mg caps) 180 ml (6 mg/ml) / 30 days (suspension)*	Xofluza™ (baloxavir marboxil) QTY LIMIT=2 tablets/30 days	**Oseltamivir, Tamiflu, Relenza:** Tamiflu and Relenza will NOT require prior-authorization at this time when prescribed within the following quantity limits: **Relenza:** 20 blisters per 30 days **Oseltamivir/Tamiflu:** 75mg or 45mg: 10 caps per 30 day **Oseltamivir/Tamiflu:** 30mg: 20 caps per 30 days **Oseltamivir/Tamiflu:** Suspension (6mg/ml): 180ml (3 bottles) per 30 days **Xofluza:** Patient is ≥ 12 years of age AND there is a clinical, patient-specific reason the patient cannot use a preferred agent. **Note:** A maximum of one single dose per 30 days will be approved based on the patient's body weight: 40mg (2 x 20mg tablets) for patients weighing between 40kg and 80kg or 80mg (2 x 40mg tablets) for patients weighing at least 80kg. **Limitations:** Amantadine, Flumadine and rimantadine are not CDC recommended for use in influenza treatment or chemoprophylaxis at this time and are not covered for this indication. For information regarding amantadine see "Parkinsons Medications".
CYTOMEGALOVIRUS (CMV) INFECTION MEDICATIONS		
Valganciclovir (compare to Valctye®) tablet	Prevymis® (letermovir) Valcyte® tablets, solution Valganciclovir (compare to Valcyte®) solution	**Prevymis:** Indication is for the prophylaxis of cytomegalovirus (CMV) infection in adult CMV-seropositive recipients [R+] of an allogenic hematopoietic stem cell transplant AND therapy is initiated between day 0 and day 28 post-transplantation AND therapy will continue through day 100 post-transplantation AND for approval of injection, the patient must be unable to take oral medications. **Valcyte:** the patient has a documented intolerance to generic valganciclovir AND for approval of solution, the patient has a medical necessity for a non-solid oral dosage form. **Valganciclovir solution:** the patient has a medical necessity for a non-solid oral dosage form.
INFLUENZA VACCINES		

PREFERRED AGENTS (No PA required unless otherwise noted)	NON-PREFERRED AGENTS (PA required)	PA CRITERIA
SEASONAL Influenza Vaccine INJECTION **Inactivated Influenza Vaccine, Trivalent (IIV3), Standard Dose (egg based)** AFLURIA® Injection **Inactivated Influenza Vaccine, Quadrivalent (IIV4), Standard Dose (egg based)** AFLURIA® QUADRIVALENT Injection FLUARIX® QUADRIVALENT Injection FLULAVAL® QUADRIVALENT Injection FLUZONE® QUADRIVALENT Injection	**Adjuvanted Inactivated Influenza Vaccine, Trivalent (IIV3), Standard Dose (egg based)** Fluad™ Injection **Inactivated Influenza Vaccine, Trivalent (IIV3), High Dose (egg based)** Fluzone High-Dose® Injection **Recombinant Influenza Vaccine, Quadrivalent (RIV4) (egg FREE)** Flublok® Injection **Inactivated Influenza Vaccine, Quadrivalent (ccIIV4), Standard Dose (cell culture based) (NOT egg free)** Flucelvax Quadrivalent® Injection **Live Attenuated Influenza Vaccine, Quadrivalent (LAIV4) (egg based)** Flumist® Quadrivalent Intranasal	**Flucelvax Quadrivalent:** Prescriber provides clinical rationale why one of the preferred influenza vaccines cannot be used. **Flublok:** Patient must have a documented severe reaction to egg based influenza vaccine. **Flumist:** Flumist is being requested for influenza prophylaxis during flu season AND The patient is between the ages of 19 and 49 years old, AND Prescriber provides documentation of a contraindication to an intramuscular injection (e.g., currently on warfarin; history of thrombocytopenia) or other compelling information to support the use of this dosage form. **Fluzone High Dose, Fluad:** Vaccine is being requested for influenza prophylaxis during flu season AND patient is ≥ 65 years old AND Prescriber provides clinical rationale why one of the preferred influenza vaccines cannot be used. Note: the CDC and its Advisory Committee on Immunization Practices (ACIP) have not expressed a preference for any flu vaccine formulation for this age group.
VACCINES - OTHER		
Preferred after Age Limit is met Gardasil Shingrix Zostavax		**Gardasil**: Covered for 19 years old to 45 years old (those under 19 should be referred to their pediatrician or PCP for state-supplied vaccine) **Shingrix**: Covered if ≥ 50 years of age **Zostavax:** Covered if ≥ 60 years of age Vaccines on the Advisory Committee on Immunization Practices (ACIP) list of recommended vaccines for children ≤ 18 years of age are supplied through the Vaccines for Children program administered by the Vermont Department of Health, and are not available through DVHA's pharmacy programs • Vaccines on the ACIP list of recommended vaccines for adults ≥ 19 years of age are available at many primary care provider offices and through the pharmacy programs. Vaccines are subject to the same limitations as the ACIP guideline recommendations. Providers who participate in the Blueprint for Health

PREFERRED AGENTS (No PA required unless otherwise noted)	NON-PREFERRED AGENTS (PA required)	PA CRITERIA
		initiative must enroll in the Vaccines for Adults program administered by the Vermont Department of Health. The ACIP guidelines and information about enrollment in these programs can be found at http://healthvermont.gov/hc/imm/provider.aspx•Vaccines not on the recommended list may require Prior Authorization.
ANTI-MIGRAINE AGENTS		
Calcitonin gene-related peptide (CGRP) Inhibitors: Initial approval is 6 months; renewals are 1 year		
Preferred After Clinical Criteria are Met Emgality® (galcanezumab-gnlm) *(Qty Limit = 240mg (2 injections) for the first 30 days followed by 120 mg (1 injection) per 30 days)*	Aimovig™ (erenumab-aooe) *(Qty Limit = 140mg per 30 days)* Ajovy® (fremanezumab-vfrm) *(Qty Limit = 225mg (1 injection) per 30 days or 675mg (3 injections) every 90 days*	**All agents :** The patient is 18 years of age or older AND patient has a diagnosis of episodic migraine (4-14 headache days per month with migraine lasting 4 hours or more) or chronic migraine (≥ 15 headache days per month, of which ≥ 8 are migraine days, for at least 3 months) AND patient has failed or has a contraindication to an adequate trial (≥ 60 days) of at least TWO medications for migraine prophylaxis from at least 2 different classes (tricyclic antidepressants, SNRI's, beta-blockers, or anticonvulsants). Initial approval will be granted for 6 months. For re-approval after 6 months, the patient must have documentation of a decrease in the number of headache days per month or decreased use of acute migraine medications such as triptans. Pharmacy claims will also be evaluated to assess compliance with the medication **Aimovig, Ajovy additional criteria:** The patient must have a documented side effect, allergy, or treatment failure to Emgality. **Note:** Aimovig approvals for 140mg dose(s) must use "140DOSE" package (containing 2 x 70mg syringes or auto-injectors). Approval will not be granted for 2 separate 70mg packages.
TRIPTANS		
Single Agent **ORAL** SUMATRIPTAN (compare to Imitrex®) *Quantity Limit = 18 tablets/30 days (25 mg), 9 tablets/month (50 mg, 100 mg)* RELPAX® (eletriptan) 20 mg, 40 mg *Quantity Limit = 12 tablets/30 days* RIZATRIPTAN (compare to Maxalt®) *Quantity Limit = 12 tablets/30 days* RIZATRIPTAN ODT (compare to Maxalt-MLT®)	Almotriptan 6.25mg, 12.5mg *Quantity Limit = 12 tablets/30 days* Amerge® (naratriptan) 1 mg, 2.5 mg *Quantity Limit = 9 tablets/ 30 days* Eletriptan (compare to Relpax®) *Quantity Limit = 12 tablets/30 days* Frova® (frovatriptan) 2.5 mg *Quantity Limit = 9 tablets/ 30 days* Frovatriptan (compare to Frova®) 2.5mg *Quantity Limit = 9 tablets/30 days* Imitrex®* (sumatriptan) *Quantity Limit = 18 tablets/ 30 days (25 mg), 9 tablets/ 30 days (50 mg, 100 mg),*	**Almotriptan, Amerge, Eletriptan, Frova, Frovatriptan, Imitrex, Maxalt, Maxalt MLT, Naratriptan, Zomig, Zomig ZMT, Zolmitriptan, Zolmitriptan ODT:** patient has had a documented side effect, allergy, or treatment failure to Sumatriptan, Relpax, and Rizatriptan or Rizatriptan ODT. If the request is for brand Frova, Maxalt, Zomig, or Zomig ZMT, the patient must also have a documented intolerance to the generic product. **Treximet:** patient had a documented side effect, allergy or treatment failure with 2 preferred Triptans, AND patient is unable to take the individual components (sumatriptan and naproxen) separately. **Zomig Nasal Spray, Imitrex Nasal Spray, Onzetra Xsail:** patient has had a documented side effect, allergy or treatment failure with Sumatriptan Nasal

PREFERRED AGENTS (No PA required unless otherwise noted)	NON-PREFERRED AGENTS (PA required)	PA CRITERIA

BOTULINUM TOXINS		
	Botox® (onabotulinumtoxinA) Myobloc® (rimabotulinumtoxinB) Dysport® (abobotulinumtoxinA) Xeomin® (incobotulinumtoxinA)	**BOTOX (onabotulinumtoxinA):** The indication for use is: o Strabismus and blepharospasm associated with dystonia, including essential blepharospasm, VII cranial nerve disorders/hemifacial spasm or Focal dystonias, including cervical dystonia, spasmodic dystonia, oromandibular dystonia OR Limb spasticity (e.g., due to cerebral palsy, multiple sclerosis, or other demyelinating CNS diseases) OR Focal spasticity (e.g., due to hemorrhagic stroke, anoxia, traumatic brain injury) OR Severe Axillary Hyperhidrosis (if member has failed an adequate trial of topical therapy) OR Overactive bladder or detrusor overactivity (if member has failed an adequate trial of at least TWO urinary antispasmodics (either short- or long-acting formulations) OR Chronic migraine (≥15 headache days per month, of which ≥ 8 are migraine days, for at least 3 months) and the member has failed or has a contraindication to an adequate trial of at least TWO medications for migraine prophylaxis from at least two different classes (tricyclic antidepressants, SNRI's, beta-blockers, calcium channel blockers or anticonvulsants). For re-approval after 3 months, the patient must have had an improvement in symptoms. AND The patient is >12 years of age if for blepharospasm or strabismus, >16 years of age for cervical dystonia, ≥ 2 years of age for upper limb spasticity, and >18 years of age for lower limb spasticity, hyperhidrosis, chronic migraine or overactive bladder/detrusor overactivity. **Dysport (abobotulinumtoxinA):** The patient has a diagnosis of cervical dystonia or upper limb spasiticity AND The patient is ≥18 years of age OR the patient has a diagnosis of lower limb spasticity and is 2 years of age or older. **Myobloc (rimabotulinumtoxinB):** The patient has a diagnosis of focal dystonia, including cervical dystonia, spasmodic dystonia, oromandibular dystonia AND The patient is >16 years of age **Xeomin (incobotulinumtoxinA):** The patient has a diagnosis of cervical dystonia, upper limb spasticity, or blepharospasm OR the patient has a diagnosis of

PREFERRED AGENTS (No PA required unless otherwise noted)	NON-PREFERRED AGENTS (PA required)	PA CRITERIA
		chronic sialorrhea and has a documented side effect, allergy, treatment failure, or contraindication to at least two anticholinergic agents (e.g. scopolamine, glycopyrrolate). AND The patient is ≥18 years of age **LIMITATIONS:** Coverage of botulinum toxins will not be approved for cosmetic use (e.g., glabellar lines, vertical glabellar eyebrow furrows, facial rhytides, horizontal neck rhytides, etc.). (BOTOX Cosmetic (onabotulinumtoxinA) is not covered) **IMPORTANT NOTE:** Botulinum neurotoxins are used to treat various disorders of focal muscle spasm and excessive muscle contractions, such as focal dystonias. When injected intramuscularly, botulinum neurotoxins produce a presynaptic neuromuscular blockade by preventing the release of acetylcholine from the nerve endings. As a consequence of the chemistry and clinical pharmacology of each botulinum neurotoxin product, botulinum neurotoxins are not terchangeable, even among same sterotype products. Units of biological activity are unique to each preparation and cannot be compared or converted into units of another. It is important that providers recognize there is no safe dose conversion ratio—i.e., one unit of BOTOX (onabotulinumtoxinA, formerly type A) does not equal one unit of Myobloc (rimabotulinumtoxinB, formerly type B) does not equal one unit of Dysport (abobotulinumtoxinA) does not equal one unit of Xeomin (incobotulinumtoxinA). Failure to understand the unique characteristics of each formulation of botulinum neurotoxin can result in under or over dosage. It is expected that use of these products will be based on each product's individual dosing, efficacy and safety profiles.

In addition, for approval of Uroxatral, the patient must have a documented intolerance to generic alfuzosin ER. **Avodart, dutasteride, Proscar:** The patient has a diagnosis of BPH (benign prostatic hypertrophy) AND the patient has a documented side effect, allergy or treatment failure to generic finasteride AND for approval of brand Avodart, the patient must have a documented intolerance to generic dutasteride.

PREFERRED AGENTS (No PA required unless otherwise noted)	NON-PREFERRED AGENTS (PA required)	PA CRITERIA
ANDROGEN HORMONE INHIBITORS FINASTERIDE (compare to Proscar®) *(QTY LIMIT = 1 tablet/day)* **COMBINATION PRODUCT**	finasteride (compare to Proscar®) females; males age < 45 *(QTY LIMIT = 1 tablet/day)* Proscar® *(finasteride) *(QTY LIMIT = 1 tablet/day)* Dutasteride/tamsulosin (compare to Jalyn®) *(QTY LIMIT=1 capsule/day)* Jalyn® (dutasteride/tamsulosin) *(QTY LIMIT = 1 capsule/day)*	**Finasteride for males age < 45:** The patient has a diagnosis of BPH (benign prostatic hypertrophy) **Dutasteride/tamsulosin, Jalyn:** The patient has a diagnosis of BPH (benign prostatic hypertrophy) AND the patient has a documented treatment failure/inadequate response to combination therapy with generic tamsulosin and finasteride AND is unable to take tamsulosin and dutasteride as the individual separate agents AND for approval of Jayln, the patient must have a documented intolerance to generic dutasteride/tamsulosin. **LIMITATIONS:** Coverage of androgen hormone inhibitors will not be approved for cosmetic use in men or women (male-pattern baldness/alopecia or hirsutism). (This includes Propecia (finasteride) and its generic equivalent whose only FDA approved indication is for treatment of male pattern hair loss.) Current clinical guidelines recommend the use of Cialis (tadalafil) only in men with concomitant erectile dysfunction or pulmonary hypertension. Medicaid programs do not receive Federal funding for drugs used in the treatment of erectile dysfunction so Cialis will not be approved for use in BPH.

DIGOXIN DIGOXIN Oral Solution LANOXIN® (digoxin)		
CHEMICAL DEPENDENCY		
ALCOHOL DEPENDENCY		
ACAMPROSATE DISULFIRAM 250 mg, 500 mg tab (compare to Antabuse®) NALTREXONE oral **Preferred Agent after Clinical Criteria are Met**	Antabuse®* (disulfiram)	**Antabuse**: The patient has had a documented intolerance to the generic equivalent product

PREFERRED AGENTS (No PA required unless otherwise noted)	NON-PREFERRED AGENTS (PA required)	PA CRITERIA
Vivitrol® (naltexone for extended-release injectable suspension) *(QTY LIMIT = 1 injection (380 mg) per 30 days)*		
OPIATE DEPENDENCY		
NALTREXONE oral SUBOXONE® sublingual FILM (buprenorphine/naloxone) *QTY LIMIT = 2 films per day (8 mg strength), or 1 film per day (4 mg and 12 mg strengths)* *(Maximum daily Dose = 16 mg/day, PA required for over 16mg)* ***Maximum days supply for Suboxone is 14 days*** Note: Methadone for opiate dependency can only be prescribed through a Methadone Maintenance Clinic Vivitrol® (naltrexone for extended-release injectable suspension) (QTY LIMIT = 1 injection (380 mg) per 30 days)	buprenorphine sublingual TABLET (formerly Subutex®) *QTY LIMIT = 3 tablets per day (2 mg strength) or 2 tablets/day (8 mg strength)* *(Maximum Daily Dose = 16 mg/day)* buprenorphine/naloxone (formerly Suboxone®) sublingual TABLET *QTY LIMIT = 2 tablets per day (8 mg strength) or 3 tablets per day (2 mg strength)* *(Maximum daily Dose = 16 mg/day)* Bunavail® (*QTY LIMIT= 1film per day(2.1/0.3mg, 6.1/1mg), 2films per day (4.2/0.7mg)* Zubsolv® *(QTY LIMIT=1 film per day of all strengths)* **Maximum days supply for oral buprenorphine/naloxone or buprenorphine is 14 days** Probuphine® (buprenorphine) subdermal implant *(QTY LIMIT = 4 implants per 6 months) Maximum length of therapy=1 year* Sublocade® (buprenorphine extended-release) injection *Maximum 30 day supply*	**CLINICAL CONSIDERATIONS:** Prescriber must have a DATA 2000 waiver ID number ("X DEA License") in order to prescribe buprenorphine or buprenorphine/naloxone combination products used for the treatment of opioid dependence. These products are not FDA approved for alleviation of pain. For this indication, please refer to the Opioid Analgesics PDL category. **Buprenorphine/naloxone:** FDA Medwatch form has been submitted documenting a provider-observed reaction to Suboxone films severe enough to require discontinuation (documentation of measures tried to mitigate/manage symptoms is required). **Bunavail, Zubsolv:** FDA Medwatch form has been submitted documenting a provider-observed reaction to both Suboxone films and buprenorphine/naloxone tablets severe enough to require discontinuation (documentation of measures tried to mitigate/manage symptoms is required). **Buprenorphine:** Patient is either pregnant and copy of positive pregnancy test has been submitted (duration of PA will be one 1 month post anticipated delivery date) OR Patient is breastfeeding an opiate dependent baby and history from the neonatologist or pediatrician has been submitted. Other requests will be considered after a documented trial and failure of all oral buprenorphine/naloxone combination products. **Requests to exceed quantity limits or maximum daily dose:** documentation must be submitted detailing medical necessity for requested dosage regimen. **Probuphine:** Patient must have achieved and sustained prolonged clinical stability on transmucosal buprenorphine AND is currently on a maintenance dose of ≤ 8mg per day of Suboxone® or it's transmucosal buprenorphine product equivalent (defined as stable on transmucosal buprenorphine dose of ≤ 8mg for 3 months or longer without any need for supplemental dosing or adjustments) AND the provider and patient are both enrolled in the Probuphine® REMS program AND clinical justification must be provided detailing why the member cannot use a more cost effective buprenorphine formulation. **Note:** Probuphine® will be approved as a medical benefit ONLY and will NOT be approved if billed through pharmacy point of sale. Probuphine® will not be approved for new entrants to treatment. Initial approval will be granted for 6 months with extension considered for an additional 6 months (There is no clinical experience with insertion of Probuphine® beyond a single insertion in each arm). **Sublocade:** Diagnosis of opiate use disorder confirmed (will not be approved for alleviation of pain) AND patient has been stabilized (clinically controlled cravings and withdrawal symptoms) on a steady dose of 8mg to 24mg of a transmucosal

PREFERRED AGENTS (No PA required unless otherwise noted)	NON-PREFERRED AGENTS (PA required)	PA CRITERIA
		buprenorphine product for at least 7 days AND clinical justification must be provided detailing why the member cannot use a more cost effective buprenorphine formulation. **Note:** Approval will be granted for 300mg monthly for the first 2 months followed by a maintenance dose of 100mg thereafter for a total length of approval not to exceed 6 months. A maintenance dose increase to 300mg will be considered for those patients who are able to tolerate the 100mg dose but do not demonstrate a satisfactory clinical response (including supplemental oral buprenorphine dosing, documentation of self-reported illicit opioid use, or urine drug screens positive for illicit opioid use). Once the patient is established on a maintenance dose, concurrent use of Sublocade and supplemental oral buprenorphine dosing will not be permitted. Sublocade must be dispensed directly to a healthcare provider and will not be approved for dispensing to the patient. **Vivitrol:** There must be a documented trial of oral naltrexone to establish tolerability AND Patient should be opiate free for > 7 -10 days prior to initiation of Vivitrol. If the diagnosis is alcohol dependence, the patient should not be actively drinking at the time of initial Vivitrol administration.
OPIATE WITHDRAWAL TREATMENT		
Central Alpha Agonists Clonidine IR tablets (compare to Catapres®) **Note:** Methadone for opiate dependency or withdrawal can only be prescribed through a Methadone Maintenance Clinic	Lucemyra® (lofexidine) Maximum length of therapy = 14 days	**Lucemyra:** Indication for use is the mitigation of opioid withdrawal symptoms to facilitate abrupt opioid discontinuation AND the patient is ≥ 18 years of age AND the patient is unable to tolerate clonidine due to significant side effects.
OVERDOSE TREATMENT		
NALOXONE HCL Prefilled luer-lock needleless syringe plus intranasal mucosal atomizing device (Rescue kit) NARCAN® (naloxone hcl) Nasal Spray Quantity Limit = 4 single-use sprays/28days		**Limitations: Effective 4/1/17, Evzio® is not classified as a covered outpatient drug and is therefore not covered by Vermont Medicaid.**
GASTROINTESTINAL AGENTS: CONSTIPATION/DIARRHEA, IRRITABLE BOWEL SYNDROME-CONSTRIPATION (IBS-C), IRRITABLE BOWEL SYNDROME-DIARRHEA (IBS-D), SHORT BOWEL SYNDROME, OPIOID INDUCED CONSTIPATION		
Preferred Agents (No PA Required)	**Non-preferred Agents (PA Required)**	**Criteria**

Pylori** – Double dose PPI may be approved for up to 2 weeks. **Laryngopharyngeal reflux** – Double dose PPI may be approved. **LIMITATIONS:** First-Lansoprazole® and First-Omeprazole Suspension Kits are not covered as Federal Rebate is no longer offered. Nexium 24HR OTC (esomeprazole) capsules OTC Plan Exclusion - these products are not covered.
GAUCHER'S DISEASE MEDICATIONS		

	Cerdelga *(Quantity limit=2 caps/day)*
	Cerezyme® (imiglucerase for injection)
	Elelyso® (taliglucerase alfa for injection)
	Vpriv® (velaglucerase alfa for injection)
	Miglustat (compare to Zavesca®) (QTY LIMIT = max 3 caps/daily)
	Zavesca® (miglustat) (*QTY LIMIT = max 3 caps/daily)*
	
	****Maximum days supply per fill for all drugs is 14 days****
		CRITERIA FOR APPROVAL: The diagnosis or indication is Gaucher disease (GD) type I. AND The diagnosis has been confirmed by molecular or enzymatic testing.
		Age Limits
		Elelyso, Vpriv: for patients ≥ 4 years old
		Cerezyme: for patients ≥ 2 years old
		Cerdelga, Miglustat, Zavesca: for patients ≥ 18 years old
		
		Cerezyme/Vpriv additional criteria: Failure, intolerance or other contraindication to enzyme replacement therapy with Elelyso
		
		Cerdelga additional criteria:
		• Testing to verify if CYP2D6 extensive metabolizer (EM), intermediate metabolizer (IM), poor metabolizer (PM), or if CYP2D6 genotype cannot be determined
		  ○ Dose max: 84mg twice/day if EM or IM
		  ○ Dose max: 84mg/day if PM
		  ○ Case by case determination if CYP2D6 cannot be determined
		
		Miglustat, Zavesca additional criteria:
		• For whom enzyme replacement therapy is not a therapeutic option (e.g. due to allergy, hypersensitivity, or poor venous access)

PREFERRED AGENTS (No PA required unless otherwise noted)	NON-PREFERRED AGENTS (PA required)	PA CRITERIA
GOUT AGENTS		
COLCHICINE CAPSULES PROBENECID ALLOPURINOL (compare to Zyloprim®) COLCHICINE/PROBENECID	Colcrys® (colchicine) tablet *QTY LIMIT = 3 tablets/day (gout) or 4 tablets/day (FMF)* Colchicine tablets (compare to Colcrys®) Duzallo® (lesinurad/allopurinol) Mitigare® (colchicine) capsule QTY LIMIT= 2 capsule/day Zyloprim®* (allopurinol) Zurampic® (lesinurad) Uloric® (febuxostat) *QTY LIMIT (40 mg tablets) = 1 tablet/day*	**Colcrys, colchicine tablets:** *Diagnosis or indication is Familial Mediterranean Fever (FMF) or Diagnosis* OR *Diagnosis or indication is acute treatment of gout flares:* The patient has had a documented side effect or treatment failure with at least one drug from the NSAID class OR the patient is not a candidate for therapy with at least one drug form the NSAID class due to one of the following: • The patient is 60 years of ager or older • The patient has a history of GI bleed • The patient is currently taking an anticoagulant (warfarin or heparin), an oral corticosteroid, or methotrexate. OR *Diagnosis or indication is prophylaxis of gout flares in adults:* the patient must have a documented intolerance to colchicinecapsules. **Duzallo:** The diagnosis or indication is treatment of symptomatic hyperuricemia associated with gout AND the patient has not achieved target serum uric acid levels (< 6mg/dl) with an allopurinol dose of at least 300mg or febuxostat 80mg AND patient is unable to take Zurampic and allopurinol as athe individual separate agents. **Mitigare capsules:** the diagnosis or indication is prophylaxis of gout flares in adults AND the patient must have a documented intolerance to colchicine capsules. **Uloric:** The diagnosis or indication is treatment of gout AND The patient has had a documented side effect, allergy, treatment failure or a contraindication to allopurinol. NOTE: Treatment failure is defined as inability to reduce serum uric acid levels to < 6 mg/dl with allopurinol doses of 600 mg/day taken consistently. Additionally, renal impairment is not considered a contraindication to allopurinol use. **Zurampic:** The diagnosis or indication is treatment of symptomatic hyperuricemia associated with gout AND the patient has not achieved target serum uric acid levels (< 6 mg/dl) with an allopurinol dose of at least 300mg or febuxostat 80mg AND the medication is being used in combination with a xanthine oxidase inhibitor (Zurampic is not recommended for use as monotherapy). **Zyloprim:** The patient has had a documented intolerance to generic allopurinol
GROWTH STIMULATING AGENTS		
GENOTROPIN® NORDITROPIN®	Humatrope® Nutropin® AQ Omnitrope®	**Criteria for Approval Pediatric:** 1) The patient must have one of the following indications for growth hormone: Turner syndrome confirmed by genetic

PREFERRED AGENTS (No PA required unless otherwise noted)	NON-PREFERRED AGENTS (PA required)	PA CRITERIA
	Ofev® (nintedanib) (*QTY LIMIT = 60 tabs/month)*	○ Diagnosis of idiopathic pulmonary fibrosis (IPF-ICD-9 Code 516.31 or ICD-10 code J84.112) as well as exclusion of other known causes of Interstitial Lung Disease. ○ May not be used in combination with Ofev® or Esbriet® respectively. ○ The prescriber is a pulmonologist. ○ Clinical documentation that the member is a non-smoker or has not smoked in 6 weeks. ○ FVC≥ 50% of predicted ○ AND one of the following ○ High-resolution computed tomography (HRCT) revealing IPF or probable IPF. ○ Surgical lung biopsy consistent with IPF or probable IPF. **Reauthorization Criteria:** ○ Documentation the patient is receiving clinical benefit to Esbrit® or Ofev® therapy as evidenced by < 10% decline in percent predicted FVC of < 200mL decrease in FVC AND ○ There is clinical documentation that the member has remained tobacco-free.
IMMUNOLOGIC THERAPIES FOR ASTHMA		
(Initial 3 months, Renewal 1 year)		
	Cinqair® (reslizumab) Intravenous injection Dupixent® (dupilumab) subcutaneous injection Quantity Limit = 4 syringes the first 28 days then 2 syringes every 28 days thereafter Fasenra® (benralizumab) subcutaneous injection *Quantity limit = 1 syringe every 28 days for 3 doses then 1 syringe every 56 days* Nucala® (mepolizumab) subcutaneous injection *Quantity limit = 1 vial every 28 days* Xolair® (omalizumab) subcutaneous injection *Quantity limit = 900mg every 28 days*	**Xolair®:** *Diagnosis of moderate to severe persistent asthma:* • The patient must be 6 years of age or older AND • The patient has had a therapeutic failure or contraindication to an inhaled corticosteroid (with or without chronic oral corticosteroid therapy), a leukotriene receptor antagonist, and a long-acting beta-agonist AND • The prescriber is a pulmonologist, allergist, or immunologist AND • Patient has tested positive to at least one perennial aerollergen by skin or blood test (i.e.: RAST, CAP, intracutaneous test) AND • Patient has a IgE level ≥ 30 and ≤ 700 IU/ml (ages 12 and older) OR IgE level ≥ 30 and ≤ 1300 IU/ml (ages 6-11) prior to beginning therapy with Xolair. AND • For approval of prefilled syringe, a clinically compelling reason must be provided detailing why vials cannot be used. *Diagnosis of chronic idiopathic urticaria:* • The patient must be 12 years of age or older AND • The patient has a therapeutic failure or contraindication to an H1 antihistamine (e.g. cetirizine, fexofenadine) at double the daily dose

PREFERRED AGENTS (No PA required unless otherwise noted)	NON-PREFERRED AGENTS (PA required)	PA CRITERIA
		AND • The patient has therapeutic failure or contraindication to a leukotriene receptor antagonist. AND • For approval of prefilled syringe, a clinically compelling reason must be provided detailing why vials cannot be used. **Limitations:** Xolair use will not be approved if requested for prevention of peanut related allergic reaction or in patients with a diagnosis of moderate to severe persistent asthma who are currently smoking. **Fasenra, Nucala, Cinqair, Dupixent:** • The patient must be 12 years of age or older for Fasenra/Nucala/Dupixent or 18 years of age or older for Cinqair AND • The patient must have a diagnosis of severe persistent asthma with an eosinophilic phenotype as defined by pre-treatment blood eosinophil count of ≥ 150 cells per mcL within the previous 6 weeks or ≥ 300 cells per mcL within 12 months prior to initiation of therapy AND • The patient has a history of 2 or more exacerbations in the previous year despite regular use of high dose inhaled corticosteroids (ICS) AND inadequate symptom control when given in combination with another controller medication (long-acting beta agonist {LABA} or leukotriene receptor antagonist {LTRA}) for a minimum of 3 consecutive months, with or without oral corticosteroids. Pharmacy claims will be evaluated to assess compliance with therapy. AND • The patient has a pre-treatment FEV_1 < 80% predicted AND • The prescriber is an allergist, immunologist, or pulmonologist. AND For continuation of therapy after the initial 3 month authorization, the patient must continue to receive therapy with both an ICS and a controller medication (LABA or LTRA) AND have either a decreased frequency of exacerbations OR decreased use of maintenance oral corticosteroids OR reduction in the signs and symptoms of asthma OR an increase in predicted FEV_1 from baseline. **Limitations:** Dupixent®, Fasenra®, Nucala® and Cinqair® will not be considered in patients who are currently smoking, in combination with omalizumab, OR for treatment of other eosinophilic conditions.
IMMUNOSUPPRESANTS, ORAL		
AZATHIOPRINE tablet CYCLOSPORINE capsule CYCLOSPORINE MODIFIED MYCOPHENOLATE MOFETIL tablet, capsule,	Astagraf® XL (tacrolimus) capsule Azasan® (azathioprine) tablet Cellcept® (mycophenolate mofetil) tablet, capsule, suspension	**Criteria:** The patient has been started and stabilized on the requested product OR the patient has a documented side effect, allergy, or treatment failure to a preferred agent (if a product has and AB rated generic, there must be a trial of the generic formulation).

GEMFIBROZIL (compare to Lopid®) 600 mg FENOFIBRATE NANOCRYSTALIZED (compare to Tricor®) 48 mg, 145 mg tablets *Quantity Limit = 1 tablet/day*	Antara® (fenofibrate micronized) 43 mg, 30 mg, 90 mg, 130 mg fenofibrate tablets (compare to Lofibra® tablets) 54 mg, 160 mg fenofibrate capsule (compare to (Lipofen®) 50 mg, 150 mg fenofibrate micronized capsule (compare to Lofibra® capsules) 67 mg, 134 mg, 200 mg fenofibrate micronized (compare to Antara®) 43 mg, 130 mg fenofibric acid (compare to Trilipix) 45mg, 135mg delayed release capsule fenofibric acid 35 mg, 105 mg *Quantity Limit = 1 capsule/day* Fenoglide® (fenofibrate MeltDose) 40 mg, 120 mg Fibricor® (fenofibric acid) 35 mg, 105 mg Lipofen® (fenofibrate) 50 mg, 150 mg Lopid® (gemfibrozil) 600 mg Tricor® (fenofibrate nanocrystallized) 48 mg, 145 mg Triglide® (fenofibrate) 50 mg, 160 mg Trilipix (fenofibric acid) 45 mg, 135 mg delayed release capsule	**Lopid:** The patient has had a documented intolerance to generic gemfibrozil. **Antara, fenofibrate, fenofibrate micronized, fenofibric acid (all strengths), Fenoglide,Fibricor, Lipofen, Tricor, Triglide, and Trilipix:** The patient is taking a statin concurrently and has had a documented side effect, allergy, or treatment failure with preferred fenofibrate nanocrystallized. (If a product has an AB rated generic, there must have been a trial with the generic formulation.) OR The patient has had a documented side effect, allergy, or treatment failure to gemfibrozil and preferred fenofibrate nanocrystallized. (If a product has an AB rated generic, there must have been a trial with the generic formulation.)
HOMOZYGOUS FAMILIAL HYPERCHOLESTEROLEMA (HoFH) AGENTS		

PREFERRED AGENTS (No PA required unless otherwise noted)	NON-PREFERRED AGENTS (PA required)	PA CRITERIA
All products require a PA	Juxtapid® (lomitapide) Capsule *QTY LIMIT = 5 and 10 mg caps (1 per day), 20 mg cap (3 per day)* *QTY LIMIT = 4 syringes(4 ml)/28 days* Maximum days' supply per fill for all drugs is 28 days	**CRITERIA FOR APPROVAL:** Patient has a diagnosis of homozygous familial hypercholesterolemia (HoFH) AND Medication will be used as adjunct to a low-fat diet and other lipid-lowering treatments AND Patient does not have any of the following contraindications to therapy: ▪ Pregnancy ▪ Concomitant use with strong or moderate CYP3A4 inhibitors ▪ Moderate or severe hepatic impairment or active liver disease including unexplained persistent abnormal liver function tests AND Patient has tried and had an inadequate response, intolerance or contraindication to BOTH atorvastatin and rosuvastatin. Note: Re-approval requires confirmation that the patient has responded to therapy (i.e. decreased LDL levels) AND the patient does not have any contraindications to therapy.
NICOTINIC ACID DERIVATIVES		
NIACIN NIASPAN® (niacin extended release)	Niacin extended release (compare to Niaspan®)	**CRITERIA FOR APPROVAL:** The patient has a documented intolerance to the branded product.
STATINS		
ATORVASTATIN (compare to Lipitor®) CRESTOR® (rosuvastin) LOVASTATIN PRAVASTAIN (compare to Pravachol®) ROSUVASTATIN (compare to Crestor®) SIMVASTATIN (compare to Zocor®) **Note:** All preferred agents have a quantity limit of 1 tablet/day	Altoprev® (lovastatin SR) Fluvastatin Fluvastatin ER (compare to Lescol® XL) Lescol® XL (fluvastatin ER) Lipitor® (atorvastatin) Livalo® (pitavastatin) Pravachol® (pravastatin) Zocor® (simvastatin) Zypitamag™ (pitavastatin) **Note:** All non-preferred agents have a quantity limit of 1 tablet/day except fluvastatin IR which has a quantity limit of 2 tablets/day.	**Non-preferred agents (except as noted below):** The patient must have a documented side effect, allergy, or treatment failure to 3 preferred statins. If the product has an AB rated generic, one trial must be the generic formulation. **Zypitamag:** The patient must have a documented side effect, allergy, or treatment failure to 3 preferred statins AND clinical justification is provided documenting why the patient is unable to use Livalo. **LIMITATIONS: Simvastatin 80 mg:** initiation of simvastatin 80 mg or titration to 80 mg is not recommended by the FDA due to the increased risk of myopathy, including rhabdomyolysis. Patients may only continue on this dose when new to Medicaid if the patient has been taking this dose for 12 or more months without evidence of muscle toxicity. If the request is for Zocor 80 mg, the patient must have met the prior treatment length requirement and have a documented intolerance to the generic equivalent
MISCELLANEOUS/COMBOS		
Ezetimibe (compare to Zetia®) *(Qty Limit = 1 tablet/day)*	Lovaza® (omega-3-acid ethyl esters) Omega-3-acid ethyl esters (compare to Lovaza®) Vascepa® (icosapent ethyl) *(QTY LIMIT = 4 capsules/day)* Zetia® (ezetimibe) *(Qty Limit = 1 tablet/day)* Ezetimibe/simvastatin (compare to Vytorin®) Vytorin® (ezetimibe/simvastatin)	**Zetia:** patient must have a documented intolerance to the generic equivalent. **Lovaza, Vascepa, Omega-3-acid ethyl esters:** The patient has been started and stabilized on this medication (Note: samples are not considered adequate justification for stabilization.) OR The patient has triglyceride levels > 500 mg/dL AND The patient has a documented contraindication, side effect, allergy, or treatment failure to a fibric acid derivative and niacin. AND If the request is for brand Lovaza, the patient has a documented intolerance to the generic equivalent.

PREFERRED AGENTS (No PA required unless otherwise noted)	NON-PREFERRED AGENTS (PA required)	PA CRITERIA
	(QTY LIMIT = 1 tablet/day) Amlodipine/atorvastatin (compare to Caduet®) *(Qty Limit = 1 tablet/day)* Caduet® (atorvastatin/amlodipine) *(Qty Limit = 1 tablet/day)*	**Amlodipine/atorvastatin, Caduet:** The patient is unable to take the individual separate agents AND for approval of Caduet, the patient must have also had a documented intolerance to the generic equivalent. **Vytorin, ezetimibe/simvastatin:** The patient has had an inadequate response to atorvastatin or rosuvastatin. AND If the request is for Vytorin 10/80, the patient has been taking this dose for 12 or more months without evidence of muscle toxicity.
PCSK9 INHIBITORS		

Preferred After Clinical Criteria are Met
 	
PRALUENT® (alirocumab)
QTY LIMIT = 2ml (75mg injection every 2 weeks or 300mg every month)/ 28 days; Max 28-day supply
	Repatha® (evolocumab) Sureclick, prefilled syringe
	QTY LIMIT = 2ml (2 injections)/ 28 days; Max 28-day supply
	Repatha® (evolocumab) Pushtronix™
	QTY LIMIT = 3.5ml (One single-use infusor and prefilled cartridge)/ 28 days; Max 28-day supply
		Criteria for approval:
		• Age > 18 years of age **or** > 13 and dx of homozygous familial hypercholesterolemia (HoFH)
		• Concurrent use with statin therapy
		• Documented adherence to prescribed lipid lowering medications for the previous 90 days
		• Recommended or prescribed by a lipidologist or cardiologist
		• Inability to reach goal LDL-C despite a trial of 2 or more maximum tolerated dose of statins (one of which must be atorvastatin or rosuvastatin) and ezetimibe 10mg daily
		Additional criteria for the diagnosis of heterozygous familial hypercholesterolemia (HeFH): (both are required)
		• Total cholesterol > 290 mg/dL OR LDL-C > 190 mg/dL AND one of the following
		  ○ Presence of tendon xanthomas **OR**
		  ○ In 1st or 2nd degree relative-documented tendon xanthomas, MI at age ≤ 60 years or TC > 290 mg/dL
		• For approval of Repatha, the patient must have a documented side effect, allergy, or treatment failure with Praluent.
		
		Additional criteria for the diagnosis of clinical atherosclerotic cardiovascular disease:
		• History of MI, angina, coronary or other arterial revascularization, stroke, TIA, or PVD of atherosclerotic origin
		• For approval of Repatha, the patient must have a documented side effect, allergy, or treatment failure with Praluent.
		
		Additional criteria for the diagnosis of homozygous familial hypercholesterolemia (Repatha only):
		• Total cholesterol and LDL-C > 600 mg/dL and TG within reference range **OR**
		• Confirmation of diagnosis by gene testing

LITHIUM CARBONATE (formerly Eskalith®) LITHIUM CARBONATE SR (compare to Lithobid®, formerly Eskalith CR®) LITHIUM CITRATE SYRUP	Equetro® (carbamazepine SR) Lithobid®* (lithium carbonate SR)	**Lithobid:** The patient has had a documented side effect, allergy, or treatment failure with the generic equivalent of the requested medication. **Equetro:** The patient has had a documented side effect, allergy, or treatment failure with a carbamazepine product from the anticonvulsant therapeutic drug category
MOVEMENT DISORDERS		
Preferred After Clinical Criteria are Met XENAZINE® tablets (tetrabenazine) *(Maximum 1 month supply per fill)* *Quantity limit = 50 mg/day at initial approval (12.5 mg tablets ONLY), up to100 mg/day at subsequent approvals (12.5 mg or 25 mg tablets)*	Austedo® (deutetrabenazine) tablets (Maximum 1 month supply per fill) Quantity limit = 48mg/day Ingrezza® (valbenazine tosylate) capsules (Maximum 1 month supply per fill) Quantity limit =80mg/day) Tetrabenzaine (compare to Xenazine®) (Maximum 1 month supply per fill) Quantity limit = 50mg/day at initial approval (12.5mg tablets ONLY), up to 100mg/day at subsequent approvals (12.5mg or 25mg tablets)	**Austedo:** The diagnosis or indication for the requested medication is Huntington's Disease (HD) with chorea or Tardive Dyskinesia (TD) AND the patient is ≥18 years of age AND the patient has a documented side effect, allergy, contraindication or treatment failure with Xenazine. **Ingrezza:** The diagnosis or indication for the requested medication is Tardive Dyskinesia (TD) AND the patient patient is ≥18 years of age AND the patient has a documented side effect, allergy, contraindication or treatment failure with Xenazine. **Tetrabenazine:** The patient must have a documented intolerance to brand Xenazine. **Xenazine:** The diagnosis or indication for use is Tourette Syndrome OR the

PREFERRED AGENTS (No PA required unless otherwise noted)	NON-PREFERRED AGENTS (PA required)	PA CRITERIA
		diagnosis or indication for use is Huntington's Disease (HD) with Chorea or Tardive Dyskinesia (TD) AND the patient is ≥18 years of age. **Note:** Austedo, Tetrabenazine, and Xenazine are contraindicated in patients who are suicidal, and in patients with untreated or inadequately treated depression.
MUCOSAL COATING AGENTS		
ALUMINUM HYDROXIDE†(formerly Amphojel®) EPISIL® (wound barrier) GELCLAIR® (povidone sodium hyaluronate glycyrrhetinic acid gel) MYLANTA/DIPHENYDRAMINE/LIDOCAINE VISCOUS (aka "Magic Mouthwash") Or other similar single or combination products	MuGard® (mucoadhesive oral wound rinse) *(QTY LIMIT = 4 bottles/month)*	**MuGard:** Patient is receiving radiation and/or chemotherapy. AND The patient has had a documented side effect, allergy or treatment failure with at least one oral mucosal coating agent (e.g. aluminum hydroxide suspension, Mylanta) or a topical anesthetic (e.g. viscous lidocaine or diphenhydramine solutions) or combinations of similar agents. **Additional criteria for viscous lidocaine:** • Due to a FDA safety alert, viscous lidocaine will require prior authorization for children ≤3 years of age.
MULTIPLE SCLEROSIS MEDICATIONS		
INJECTABLES **Interferons** AVONEX® (interferon *B*-1a) vial BETASERON® (interferon *B*-1b) REBIF® (interferon *B*-1a) REBIF® REBIDOSE (interferon *B*-1a) **Other** COPAXONE® 20 mg (glatiramer acetate) *(QTY LIMIT = 1 kit/30 days)*	Avonex® (interferon B-1a) pre-filled syringe, auto-injector Extavia® (interferon beta-1b) Copaxone® 40 mg (glatiramer)*(QTY LIMIT = 12 syringes(12 ml)/28 days)* Glatiramer Acetate (compare to Copaxone®)20mg (QTY LIMIT=1kit/30days) Glatiramer Acetate (compare to Copaxone®) 40mg (QTY LIMIT = 12 syringes (12 ml)/28 days) Glatopa® 20mg (glatiramer acetate) (QTY LIMIT=1 carton (30 syringes/30 days) Glatopa® 40 mg (glatiramer) (QTY LIMIT = 12 syringes (12 ml)/28 days) Lemtrada® (alemtuzumab) intravenous Ocrevus® (ocrelizumab) (QTY LIMIT=300mgx2doses then 600mg every 6 months thereafter)	**Ampyra:** patient must have a documented intolerance to the generic equivalent. **Avonex syringe, Avonex auto-injector:** patient has been started and stabilized on the medication (Note: samples are not considered adequate justification for stabilization) OR clinical justification has been provided detailing why the member cannot use Avonex vials or Rebif. **Copaxone 40 mg Syringe:** Patient has a diagnosis of multiple sclerosis. AND The patient has a documented side effect, allergy, treatment failure, or contraindication to at least one preferred drug (not Copaxone 20 mg). AND The patient is unable to tolerate or be compliant with Copaxone 20 mg daily dosing. **Extavia:** Patient has a diagnosis of multiple sclerosis. AND The provider provides a clinical reason why Betaseron cannot be prescribed. **Glatiramer, Glatopa:** Patient is ≥ 18 years AND diagnosis of relapsing forms of Multiple Sclerosis AND the provider provides a clinical reason why Copaxone cannot be prescribed.

PREFERRED AGENTS (No PA required unless otherwise noted)	NON-PREFERRED AGENTS (PA required)	PA CRITERIA
ORAL AUBAGIO® (teriflunamide) tablet *(QTY LIMIT = 1 tablet/day, maximum 28 day supply per fill)* DALFAMPRIDINE ER tablet (compare to Ampyra®) QTY LIMIT = 2 tablets/day, maximum 30 day supply per fill GILENYA® (fingolimod) capsule *(QTY LIMIT = 1 capsule/day, maximum 30 day supply per fill)*	Plegridy® (peginterferon beta-1a) Ampyra® (dalfampridine ER) tablet QTY LIMIT = 2 tablets/day, maximum 30 day supply per fill Tecfidera® (dimethyl fumarate) *(QTY LIMIT = 2 capsules/day, maximum 30 day supply per fill)* Tysabri® (natalizumab)	**Lemtrada:** Patient has a diagnosis of relapsing multiple sclerosis AND The prescriber, patient, and pharmacy are registered with the REMS program. **Ocrevus:** Patient is ≥18 years AND has a diagnosis of relapsing multiple sclerosis AND has a documented side effect, allergy, treatment failure or contraindication to at least two preferred drugs and Tysabri, OR Diagnosis of relapsing multiple sclerosis and the patient has a documented side effect, allergy, treatment failure, or contraindication to two preferred drugs and has tested positive for anti-JVC antibodies. OR Patient is ≥18 years AND has a diasnosis of primary progressive multiple sclerosis. **Plegridy:** Patient is ≥ 18 years. Diagnosis of relapsing form of Multiple Sclerosis. Documented side effect, allergy, treatment failure or contraindication to at least three preferred drugs including at least one preferred form of interferon. **Tecfidera:** The patient is started and stabilized on the requested medication (Note: samples are not considered adequate justification for stabilization.) OR Patient is ≥ 18 years AND has a diagnosis of relapsing forms of Multiple Sclerosis AND the patient has a documented side effect, allergy, treatment failure, or contraindication to at least two preferred drugs. **Tysabri:** Patient has a diagnosis of relapsing multiple sclerosis and has already been stabilized on Tysabri OR Diagnosis is relapsing multiple sclerosis and the patient has a documented side effect, allergy, treatment failure, or contraindication to at least two preferred drugs.
MUSCLE RELAXANTS, SKELETAL		
Musculoskeletal Agents **Single Agent** CHLORZOXAZONE tablets *(Quantity limit = 4 tablets/day)* CYCLOBENZAPRINE†5 mg, 10 mg tablets (compare to Flexeril®) *(Quantity limit = 6 tablets/day (5 mg), 3 tablets/day (10 mg))* METHOCARBAMOL tablets (compare to Robaxin®) *(Quantity limit = 8 tablets/day)* ORPHENADRINE CITRATE ER 100 mg tablet *(Quantity limit = 2 tablets/day)*	Amrix®(cyclobenzaprine sustained-release) capsule *(Quantity limit = 1 capsule/day)* carisoprodol tablets *(Quantity limit = 4 tablets/day)* cyclobenzaprine 7.5 mg tab (compare to Fexmid®) *(Quantity limit = 3 tablets/day)* Fexmid® (cyclobenzaprine) 7.5 mg tablet *(Quantity limit = 3 tablets/day)* Lorzone® (chlorzoxazone) tablets *(Quantity limit = 4 tablets/day)* metaxalone (compare to Skelaxin®) tablets *(Quantity limit = 4 tablets/day)* Robaxin®* (methocarbamol) tablets *(Quantity limit = 8 tablets/day)*	**Amrix, cyclobenzaprine 7.5 mg, Fexmid**: The prescriber must provide a clinically valid reason why a preferred generic cyclobenzaprine cannot be used. For approval of Fexmid, the patient must also have a documented intolerance to the generic equivalent. **Brand skeletal muscle relaxants with generics available (Flexeril, Robaxin):** The patient has had a documented side effect, allergy or treatment failure with two different preferred musculoskeletal agents (One trial must be the AB rated generic). **carisoprodol, carisoprodol/ASA, carisoprodol/ASA/codeine, Lorzone, Soma, metaxolone, Skelaxin:** The patient has had a documented side effect, allergy or treatment failure with two different preferred musculoskeletal agents. Additionally, if a brand name product is requested where an AB rated generic exists, the patient must also have had a documented intolerance to the generic product.

PREFERRED AGENTS (No PA required unless otherwise noted)	NON-PREFERRED AGENTS (PA required)	PA CRITERIA
Combination Product All products require PA *ASA = aspirin* **Maximum duration of therapy all musculoskeletal agents = 90 days** **Antispasticity Agents** BACLOFEN DANTROLENE (compare to Dantrium®) TIZANIDINE (compare to Zanaflex®) tablets	Skelaxin® (metaxalone) tablets *(Quantity limit = 4 tablets/day)* Soma® (carisoprodol) tablets *(Quantity limit = 4 tablets/day)* carisoprodol, ASA (previously Soma Compound®) *(Quantity limit = 4 tablets/day)* carisoprodol, ASA, codeine *(Quantity limit = 4 tablets/day)* Dantrium®* (dantrolene) tizanidine (compare to Zanaflex®) capsules Zanaflex® (tizanidine) capsules Zanaflex®* (tizanidine) tablets	**Dantrium, Zanaflex tablets:** The patient must have a documented intolerance with the AB rated generic product. **Tizanadine capsules, Zanaflex capsules:** The prescriber must provide a clinically valid reason why generic tizanidine tablets cannot be used. AND If the request is for Zanaflex capsules, the patient must have a documented intolerance to generic tizanadine capsules
MUSCULAR DYSTROPHY AGENTS		
	Emflaza™ (deflazacort) *(Maximum 30 day supply per fill)* Exondys 51™ (eteplirsen)	**Emflaza:** • The patient must be ≥ 2 years of age AND • The patient must have a diagnosis of Duchenne MuscularDystrophy AND • There is documented improvement in muscle function or strength with use of prednisone, but the patient has experienced weight gain >10% of body weight withing 3 months or >25% within 1 year. **Exondys:** • The patient must have a diagnosis of Duchenne Muscular Dystrophy with a confirmed mutation of the DMD gene that is amenable to exon 51 skipping (results of genetic testing must be submitted) AND • The prescriber is, or has consulted with, a neuromuscular disorder specialist AND • The dose does not exceed 30mg/kg once weekly AND • The patient is currently on a stable corticosteroid dose for at least 6 months.

PREFERRED AGENTS (No PA required unless otherwise noted)	NON-PREFERRED AGENTS (PA required)	PA CRITERIA
		• Note: Initial approval will be granted for 6 months. For re-approval after 6 months, the patient must demonstrate a response to therapy as evidenced by continued or improved clinically meaningful function.
NEUROGENIC ORTHOSTATIC HYPOTENSION		
FLUDROCORTISONE† MIDODRINE†	Northera®	**Quantity Limits:** • Initial 2 weeks approval • Continued therapy approvals based on documentation of continued benefit clinically and as evidenced by positional blood pressure readings **Clinical Criteria:** • diagnosis of neurogenic orthostatic hypotension caused by primary autonomic failure (Parkinson's disease, multiple system atrophy, or pure autonomic failure), dopamine beta-hydroxylase deficiency, or non-diabetic autonomic neuropathy, AND • the presentation of symptoms including dizziness, lightheadedness, and the feeling of "blacking out" AND • Failure of multiple non-pharmacologic measures as appropriate (e.g. removal of offending medications, compression stockings, increased fluid and salt intake) AND • Failure, intolerance or contra-indication to fludrocortisone AND midodrine
NEUROPATHIC PAIN & FIBROMYALGIA AGENTS
